2016 USDA Drought Assistance Programs Available to Eligible Alabama Farmers

Montgomery, AL- As of October 20, 2016, 32 counties in Alabama have been designated as primary natural disaster areas and 15 additional counties are classified as contiguous counties by the U.S. Department of Agriculture (USDA) because of the recent drought.

Due to a significant number of counties impacted by drought conditions, several drought assistance programs are now offered by the USDA. Programs offered by USDA-FSA are described below:

Livestock Forage Disaster Program (LFP) – LFP is designed to provide compensation to eligible livestock producers who have suffered grazing losses due to drought. The grazing losses must be due to a qualifying drought condition during a county's normal grazing period. Eligibility requirements are for those livestock producers who own or lease land in a county assessed by the U.S. Drought Monitor as: D2 (severe drought) for 8-consecutive weeks, D3 (extreme drought), or D4 (exceptional drought). LFP payments are calculated based on the drought conditions supported by the U.S. Drought Monitor.

Emergency Loan Program (ELP) – An emergency loan is offered by FSA to producers within counties declared by the President or designated by the Secretary of Agriculture as a primary disaster area. Contiguous counties are eligible for emergency loans. A variety of terms must be met in order to become eligible for an emergency loan.

Non-insured Crop Disaster Assistance Program (NAP) – NAP provides financial assistance to producers of non-insurable crops to protect against natural disasters resulting in minimal yields or crop losses. Drought is considered an eligible cause of loss. Coverage eligibility for NAP applies to those producers who have completed an application of coverage and paid the appropriate services fees prior to NAP closing dates established by the Farm Service Agency during 2016.

Commissioner John McMillan of the Alabama Department of Agriculture and Industries is encouraging producers impacted by the drought to contact their local USDA-Farm Service Agency (FSA) office regarding eligibility of available programs. “We want to make certain Alabama producers are aware of all program opportunities offered by USDA-FSA due to losses as a result of the drought,” says McMillan.

The link below provides contact information to various USDA-FSA county offices in Alabama where producers can inquire about additional program details.

Application Period Opens for Communities to Exercise Local Disaster Response

FEMA's Emergency Management Institute conducts *Integrated Emergency Management Courses (IEMC)* throughout the year and across the country. The four-and-a-half day training course is designed specifically for communities, providing both lecture and exercise-based training focused on response operations for a disaster or emergency that could happen in their area.

IEMC courses simulate realistic crisis situations that emergency operations center personnel and community leadership/elected officials may encounter during disasters or other events. Also, the course enhances the skills of participating officials and provides a forum to evaluate the effectiveness of their specific emergency policies, plans, and procedures to protect life and property. The course's target audience includes state, local, tribal, and territorial government personnel; their elected and appointed officials; supervisory, operations, and emergency support personnel; nonprofit organizations; the private sector; law enforcement personnel; firefighters; attorneys; public information officers; planners; and more.

IEMC classes are principally delivered at FEMA's Emergency Management Institute at the National Emergency Training Center in Emmitsburg, Maryland; however, delivery may also occur in the community. HUD Launches Small Contractors Initiative Curriculum

The Department of Housing and Urban Development's Office of the DAS for Economic Development in partnership with the Office of Fair Housing and Equal Opportunity, and Office of Field Policy and Management, along with BusinessUSA and the Small Business Administration announce the launch of a new curriculum. The [*Small Contractors Initiative curriculum*](#) focuses on materials that will assist small contractors achieve bondable status such that they can more readily pursue federal contracting opportunities as independent firms.

The goal is to provide the information in a pre-packaged format to small business development centers and any other organization that provides technical assistance and training to small businesses. It provides the opportunity to engage with a cohort of small contractors using both face-to-face instruction as well as distance learning. The consolidation of materials to teach these topics provides local small business development organizations the opportunity to tap into a wealth of information, while using their ever-shrinking resources for this type of training in a more targeted way. In other words, organizations can focus on providing one-on-one consultations with small businesses rather than spending the time to develop the materials for use in these types of trainings.

This [curriculum](#) gives small contractors the tools they need to get a bond and set them on a path to grow their businesses.

Congresswoman Terri Sewell Appointed to Serve on House Ways and Means Committee

Washington, D.C. – Today, Congresswoman Terri A. Sewell (AL-7) was appointed to serve on the House Ways and Means Committee by the House Democratic Steering and Policy Committee and approved by the full Democratic Caucus.

"I am honored to sit on the prestigious House Committee on Ways and Means. Since my election to Congress in 2010, I have maintained a strong interest in serving on this coveted committee because of its profound impact on the health and welfare of my Alabama constituents. From healthcare and Medicare to Social Security and tax reform, the issues before the Ways and Means Committee directly affect the everyday lives of the people I represent and the concerns I have fought so passionately to defend.

"As the second African American woman ever to serve on the House Ways and Means Committee, I hope to bring a unique voice to the Committee that is further enhanced by the perspective of representing underserved communities in the industrial and rural South. Given the Republican agenda in the 115th Congress to repeal the Affordable Care Act, to privatize Medicare and to undermine Social Security, it will be imperative to have strong advocates who will fiercely protect the social safety net that provides a lifeline for so many Americans. If Democrats are to win back the South, we have to understand the plight of the unemployed white coal miner, the disaffected single mother and the struggles of everyday Americans to earn a decent wage, educate their children and dare to live the American dream. It is this missing perspective that I will represent at the policy table by my appointment to the House Committee on Ways and Means."

Background on the House Ways and Means Committee:

The Committee on Ways and Means is the oldest and most powerful committee of the United States Congress, and is the chief tax-writing committee in the House of Representatives. The Committee derives a large share of its jurisdiction from Article I, Section VII of the U.S. Constitution which declares, "All Bills for raising Revenue shall originate in the House of Representatives."

Since 1865, the Ways and Means Committee has continued to exercise jurisdiction over revenue and related issues such as tariffs, reciprocal trade agreements, and the bonded debt of the United States. Revenue-related aspects of the Social Security system, Medicare, and social services programs have come within Ways and Means' jurisdiction in the 20th century.

The roster of Ways and Means Committee members who have gone on to serve in higher office is impressive. Eight Presidents and eight Vice Presidents have served on Ways and Means, as have 21 Speakers of the House of Representatives, and four Justices of the Supreme Court.

Congresswoman Terri Sewell Statement

on the Selection of Alabama Senator Jeff Sessions

as U.S. Attorney General

Birmingham, AL – Congresswoman Terri A. Sewell (D-AL) previously issued the following statement on the selection of Senator Jeff Sessions as the U.S. Attorney General in the Trump Administration:

“Senator Jeff Sessions has been given a tremendous honor and responsibility by the President-Elect to serve as the head of the Department of Justice. As a colleague and member of the Alabama delegation, I hope to work productively with him in his new position. At the same time, the Senator knows I will continue to be a fierce advocate on issues that are the cornerstone of our democracy. These issues include civil rights, immigration, voting rights, criminal justice reform, and the appointment of judicial nominees that are fair, impartial, and reflective of America's diversity of thought and experiences.

While we do not agree on many important social justice issues, Senator Sessions and I have enjoyed a productive working relationship on economic development issues that have benefited my constituents and our state. I am also appreciative that he was the Senate sponsor of the Foot Soldiers Congressional Gold Medal Bill that paid tribute to those who sacrificed for the equal right to vote in this country. Over the past six years in my personal interactions with Senator Sessions, I have known him as someone who is willing to hear dissenting views. It will be imperative now more than ever that he weigh all sides of the crucial issues and make reasoned decisions that will benefit all Americans.

As the Representative of Alabama’s 7th Congressional district, I share the serious concerns raised by the national civil rights community, and I stand with my constituents in holding Senator Sessions accountable for protecting the precious civil and human rights of all Americans in his new role as the nation's top law enforcer.”

Program:

Cybermanufacturing Systems

Description:

There is an opportunity for researchers to pursue research and educational efforts to accelerate the creation of an interoperating, cross-process manufacturing service layer that enables the rapid, bottom-up transformation of access to manufacturing services. Such a service layer can allow creative entrepreneurs and companies to both furnish and access manufacturing apps that span the full spectrum from ideation to physical realization, giving rise to an era of cybermanufacturing. The cybermanufacturing service layer differs from existing Internet services in that it needs an architecture that can incrementally incorporate and organize the rich and deep semantic elements of manufacturing knowledge, requiring an almost unlimited capacity to expand the range and depth of content contributed in the form of partitioned, but interoperating, manufacturing applications. Deadline is **OPEN**.

Cyber-Physical Systems (CPS) (Joint NSF) Competitive Grants Program - (CFA 10.310)

Description:

In 2017, NSF is working closely with multiple agencies of the federal government, including the U.S. Department of Agriculture (USDA) National Institute of Food and Agriculture (NIFA) to identify basic research needs in CPS common across multiple application domains, along with opportunities for accelerated transition to practice.

Cyber-physical systems (CPS) are engineered systems that are built from, and depend upon, the seamless integration of computational algorithms and physical components. Advances in CPS will enable capability, adaptability, scalability, resiliency, safety, security, and usability that will far exceed the simple embedded systems of today. CPS technology will transform the way people interact with engineered systems -- just as the Internet has transformed the way people interact with information. New smart CPS will drive innovation and competition in sectors such as agriculture, energy, transportation, building design and automation, healthcare, and manufacturing.

The December 2010 report of the President's Council of Advisors on Science and Technology (PCAST) titled [*Designing a Digital Future: Federally Funded Research and Development in Networking and Information Technology*](#) calls for continued investment in CPS research because of its scientific and technological importance as well as its potential impact on grand challenges in a number of sectors critical to U.S. security and competitiveness such as the ones noted above. These challenges and technology gaps are further described in a [*CPS Vision Statement*](#) published in 2012 by the federal Networking and Information Technology Research and Development (NITRD) CPS Senior Steering Group.

The PCDC is intended to support research for the development and testing of new molecular and imaging biomarkers for identifying patients at high risk for PDAC (because of genetic factors or the presence of precursor lesions) who could be candidates for early intervention. The research will be conducted by individual multi-disciplinary research teams, hereafter called Units. The Units will undertake studies on the following areas: identification and testing of biomarkers measurable in bodily fluids for early detection of PDAC or its precursor lesions; determine which pancreatic cysts are likely to progress to cancer; develop molecular- and/or imaging-based approaches for screening populations at high risk of PDAC; conduct biomarker validation studies; and collect longitudinal biospecimens for the establishment of a biorepository. All Units are expected to participate in collaborative activities with other Units and share ideas, specimens and data within the Consortium.

Program: **Good Sports Accepting Applications for Sports Equipment Grant**

Description: Good Sports helps lay the foundation for healthy, active lifestyles by providing athletic equipment, footwear, and apparel to disadvantaged young people nationwide. By working closely with teams, coaches, and community leaders across the United States, the organization is able to focus on the respective needs of each individual program and help offset the main factors causing the greatest challenges.

Good Sports is accepting applications from organizations and schools for equipment, apparel, and footwear for a wide range of sports. Organizations that are approved will have access to equipment, apparel, and footwear inventory for a two-year period. During that time, organizations can make up to six separate donation requests — as long as need is well documented, donations will be granted. There is no need to resubmit a full application again during the two-year period.

To be eligible, applicants must directly serve youth between the ages of 3 and 18; serve youth in an economically disadvantaged area; be located in North America (the U.S. and Canada); and operate an organized sport, recreational activity, or fitness program that offers consistent and structured opportunity for play to large groups of children. Schools must apply as a whole; applications for individual programs within a school will not be considered. Donation requests for short-term events such as sports camps and tournaments or to individual athletes will not be considered.

While the equipment, apparel, and footwear received through the program are free, recipients are expected to pay shipping and handling costs, which amount to roughly 10 percent of the donation value, with a maximum fee of \$1,500.

Applications are reviewed on a rolling basis. It is recommended, however, that organizations apply at least eight weeks prior to the start of their particular season or program to ensure the desired equipment can be accessed and shipped on time.

Program: [**Karma for Cara Foundation Invites Applications for Youth Microgrants**](#)

Description: The Karma for Cara Foundation is a nonprofit founded by 21-year-old Cara Becker and her family while she was undergoing treatment for leukemia at the Johns Hopkins Kimmel Cancer Center. Cara and her two brothers began volunteering at a young age as part of their family's commitment to community service. She and her family saw a tremendous need to help support other patients and their families who were also challenged by cancer. Tragically, Cara passed four months after her diagnosis, yet her wish to help others through K4C lives on with the support of an ever-growing circle of family and friends.

As part of an effort to promote and support youth voluntarism, k4C started a microgrant program in fall 2014 to encourage kids 18 and under to apply for a grant of between \$250 and \$1,000 to complete service projects in their communities. Examples of fundable projects include but are not limited to turning a vacant lot into a community garden, rebuilding a school playground, and helping senior citizens get their homes ready for winter. Grants will be distributed as gift cards to home goods stores, office supply stores, grocery food chains, and toy stores. Deadline is **OPEN**.

Program: **Caplan Foundation for Early Childhood Invites Letters of Intent**

Description: The Caplan Foundation for Early Childhood supports innovative, creative projects, and programs designed to significantly enhance the development, health, safety, education, and/or quality of life of children from infancy through five years of age.

The foundation provides funding in the areas of early childhood welfare, early childhood education and play, and parenting education.

1) Early Childhood Welfare: Children can only reach their full potential when all aspects of their development, intellectual, emotional and physical are optimally supported. Providing a safe and nurturing environment for infants and preschoolers is essential, as is imparting to them the skills of social living in a culturally diverse world. To that end, the foundation supports programs that research best child rearing practices and identify models that can provide creative, caring environments to ensure all children thrive.

2) Early Childhood Education and Play: Research shows that children need to be stimulated as well as nurtured, early in life, if they are to succeed in school, work, and life. That preparation relates to every aspect of a child's development, from birth to age 5, and everywhere a child learns -- at home, in childcare settings, and in preschool. The foundation seeks to improve the quality of both early childhood teaching and learning through the development of innovative curricula and research-based pedagogical standards, as well as the design of imaginative play materials and learning environments.

3) Parenting Education: To help parents create nurturing environments for their children, the foundation supports programs that teach parents about developmental psychology, cultural child-rearing differences, pedagogy, issues of health, prenatal care and diet, as well programs that provide both cognitive and emotional support to parents.

Letters of Intent are accepted on a rolling basis. Upon review, selected applicants will be invited to submit full applications. The next deadline for submitting a LOI is **January 31, 2017**.

Description: The Public Welfare Foundation supports efforts to advance justice and opportunity for people in need. The Foundation looks for strategic points where its funds can make a significant difference and improve lives through policy and system reform that results in transformative change.

Criminal Justice

Guidelines

The Foundation’s Criminal Justice Program supports groups that are working to end the overincarceration of adults in the United States while also aiming to reduce racial disparities. In particular, the Program makes grants primarily to state-based groups that are working to:

The Foundation’s Juvenile Justice Program supports groups working to end the criminalization and reliance on incarceration of youth in the United States. In particular, the Program makes grants to groups that are working to:

- Advance state policies that dramatically restrict juvenile justice systems’ use of incarceration and out-of-home placements and prioritize the use of community-based programs for youth;
- End the practice of trying, sentencing, and incarcerating youth in the adult criminal justice system; and

Specifically, the Program makes grants to groups working to:

- Advance reforms to hold employers accountable for wage theft;

ATTENTION VETERANS:

FACT SHEET: Veterans Employment Center

The online Veterans Employment Center is the single federal source for Veterans looking for new career opportunities in the private and public sectors, as well as Service Members transitioning to the civilian workforce, military and Veteran spouses and dependents looking for employment opportunities, GI Bill beneficiaries transitioning from training to the job market and employers looking to connect with high quality applicants. It is the first interagency tool that brings together public and private job opportunities with resume building and other career tools currently offered on a variety of websites together in one place.

Through the online Veterans Employment Center, Veterans, transitioning Service Members and spouses are connected to high quality career choices by matching their identified skills with available public and private job opportunities. The site is built using an open application programming interface (API) to attract private sector innovation.

Veteran Applicant Resources:

- Quick public resume posting with an instant connection to thousands of public and private employers
- Target job search based on specific, high-demand career paths
- Single search for both public and private sector positions
- Military skills translator and resume generator
- Social media integration with popular bookmarking sites for saving job postings

Employer Resources:

- Access targeted feed of qualified resumes from Veteran applicants
- View reverse skills translation (military to civilian skills) for applicants
- Set Veterans hiring goals and track progress
- Connect to resources designed to help recruit and retain talented, Veteran employees

In connection with the First Lady and Dr. Biden’s Joining Forces initiative, the Department of Veterans Affairs worked with the Departments of Defense, Labor, and Education, and the Office of Personnel Management to design and develop the site and incorporate features of existing online employment tools at each agency. The result is an upgrade to the existing Veterans Job Bank and an integrated solution connecting Veterans, transitioning Service Members and employers.

Employers, Veterans and transitioning Service Members deserve a single, authoritative source for connecting to each other. Now that the core tools and an integrated search function exist in one single location, each agency is engaged in minimizing duplication and redundancy of current sites and services.

The Veterans Employment Center can be found at: <https://www.ebenefits.va.gov/ebenefits/jobs>
