

Guide to Grants

From the Office of Congresswoman Terri A. Sewell

Proudly Representing Alabama's 7th Congressional District

November 15, 2021

Welcome to the Guide to Grants!

I am honored to represent the 7th Congressional District of Alabama. As your representative during this unprecedented crisis of the COVID-19 Pandemic, it remains my top priority to provide you with the resources we need to keep our community safe and thriving. I will work diligently to provide you with the most current information about funding opportunities. Now more than ever, grant opportunities are vital to the success of our health and safety. This guide will identify federal, corporate, and foundation grant opportunities to assist you in goals for our communities. This guide will include links to federal agencies and resources to help you make your proposals more successful. This guide will also describe new funding opportunities for economic development, infrastructure, healthcare, and educational projects. Also, I am pleased to provide a Letter of Support for grant application projects in the 7th Congressional District of Alabama. Stay up to date with the latest information at http://sewell.house.gov Please continue to let us know when grants are awarded, especially if you found the opportunities in the *Guide to Grants*.

For more information, please visit our website at http://sewell.house.gov. To subscribe to *Guide to Grants*, sign up on our website or call us at 205.254.1960. Previous editions of the *Guide to Grants* are archived and can be found here.

Rep. Sewell Announces Over \$17 Million in RAISE Funding for the City of Tuscaloosa

U.S. Rep. Terri Sewell (AL-07) announced \$17,149,167 in funding for the City of Tuscaloosa from the U.S. Department of Transportation's Federal Rebuilding American Infrastructure with Sustainability and Equity (RAISE) grant program. This funding will be used to support the city's Tuscaloosa University Boulevard Corridor project, allowing the City of Tuscaloosa in conjunction with the University of Alabama and the Alabama Department of Transportation to make necessary transportation infrastructure improvements.

"This is great news for the City of Tuscaloosa and its partners! Investing in our infrastructure provides cities with the revenue they need to not only rebuild but modernize and make room for new innovative development," said Rep. Sewell. "I applaud the City of Tuscaloosa, the University of Alabama, and the Alabama Department of Transportation for working together to rebuild and revitalize this community. These are the types of funding opportunities that will ensure that the 7th Congressional District can build back better!"

Background:

The City of Tuscaloosa received a federal grant of \$17,149,167 from the U.S. Department of Transportation to support the city and its partners, the University of Alabama and the Alabama Department of Transportation, to make transportation infrastructure improvements.

Specifically, the RAISE funding will support the following:

Technology upgrades

Stormwater drainage improvements to address resilience and environmental issues

Expand pedestrian access from residential areas to institutional and retail areas

"The City of Tuscaloosa could not be more thrilled to be among the recipients of the Department of Transportation's RAISE Grant. These funds will give us the opportunity to make improvements to one of the major arteries connecting all of Tuscaloosa and will provide better connectivity across our community," said Tuscaloosa Mayor Walt Maddox. "The enhancements that will be made to the University Blvd corridor will include increased storm drain capacity, streetscape enhancements, advancements in security and safety measures, and the inclusion of bike lanes and underground utilities in several locations."

The Rebuilding American Infrastructure with Sustainability and Equity, or RAISE Discretionary Grant program, provides a unique opportunity for the DOT to invest in road, rail, transit and port projects that promise to achieve national objectives. Previously known as the Better Utilizing Investments to Leverage Development (BUILD) and Transportation Investment Generating Economic Recovery (TIGER) Discretionary Grants, Congress has dedicated nearly \$8.9 billion for twelve rounds of National Infrastructure Investments to fund projects that have a significant local or regional impact.

Rep. Sewell Hosts 10th Annual Job Fair in Bessemer, Announces Selma as Next Year's Job Fair Site

U.S. Rep. Terri Sewell (AL-07) hosted the 10th Annual Congressional Job Fair at the Bessemer Civic Center. This year's event featured over 50 employers from across 10 industry sectors. Returning to an inperson setting after two years, the Job Fair welcomed almost 500 job seekers. The Job Fair serves as an opportunity to foster economic growth across the 7th Congressional District, reflecting Rep. Sewell's dedication to promoting job opportunities by connecting employers directly with job seekers. It is Rep. Sewell's largest constituent outreach event of the year. Rep. Sewell is pleased to announce that next year's job fair will be held in her hometown of Selma, Alabama.

"Like me, many Americans who grew up surrounded by poverty saw the lasting effects of historic disinvestment in their communities long before the COVID-19 pandemic brought these issues into sharp clarity," said Rep. Sewell. "Since coming to Congress, I have made it my mission to address those very factors, making a commitment to the people of my District to bring economic opportunities directly to them. As one of my top priorities, the annual job fair is vital to creating a better future for Alabama families by promoting and advancing economic prosperity in the 7th District. I am beyond pleased at how well this year's job fair went! I am thrilled that we were able to return to an in-person venue, and I know that continuing to connect job seekers to employers will help us Build Back Better!"

Employers attending the 10th Annual Job Fair included:

Waffle House Milo's Tea Company Starbucks Retail Goodwill Alabama Government/State and Federal Agencies Personnel Board of Jefferson County Alabama Alcoholic and Beverage Control Board Alabama Department of Labor State of Alabama Personnel Department Alabama Department of Human Resources Alabama Department of Youth Services Alabama Department of Conservation and Natural Resources Alabama Forestry Commission Alabama Department of Environmental Management City of Selma University of Alabama at Birmingham- Recruitment Services Jefferson County Commission **United States Postal Service Health Services** Whatley Health Services, Inc Vaughan Regional Medical Center Rural Health Medical Program Birmingham VA Medical Center Mainstreet Family Care

Rep. Sewell to Attend Signing of Infrastructure Bill at the White House

U.S. Rep. Terri Sewell (AL-07) will join President Biden for the signing of the bipartisan Infrastructure Investment and Jobs Act at the White House. The bill—which passed the House of Representatives on Friday, November 5th—is the largest investment in U.S. infrastructure in nearly a century. As the only member of the Alabama Congressional delegation to vote in favor of the bill, Rep. Sewell played a lead role in securing the inclusion of critical provisions that will benefit Alabama's 7th District.

"Thanks to our hard work, the Infrastructure Investment and Jobs Act contains transformational provisions that will directly benefit the people of Alabama's 7th District," said Rep. Sewell. "In addition to creating jobs and rebuilding our roads and bridges, the bill will help alleviate blocked railroad crossings and invest hundreds of millions of dollars in improving Alabama's water infrastructure. Today, I will proudly stand with President Biden as he signs this bill and delivers these historic wins for the people!"

President Biden's Bipartisan Infrastructure Investment and Jobs Act contains several provisions that will address blocked railroad crossings:

The Railroad Crossing Elimination Program - This section would authorize \$500 million a year for the new Railroad Crossing Elimination grant program. This includes a small set-aside to carry out a highway-rail grade crossing safety information and education program.

Blocked Crossing Portal - This section would require the Federal Railroad Administration to establish a blocked crossing portal to collect information about blocked highway-rail grade crossings from the public. The Federal Railroad Administration is to use the information to assess the impact of blocked crossings, inform outreach to communities and railroads about blocked crossings, and produce an annual report on the program. This pilot program will expire three years after enactment.

National Academies Study On Trains Longer Than 7,500 Feet -This section requires the Secretary to spend between \$1 million and \$2 million on a report by the National Academies on the operations, safety, and

efficiency of trains longer than 7,500 feet, to be submitted to relevant Congressional committees within two years.

Railroad point of contact for public safety issues - This section would require all railroads to provide contact information on a public website so that the public could report public safety issues to the railroad.

The Bipartisan Infrastructure Investment and Jobs Act will make transformational investments in Alabama's water infrastructure.

Currently, up to 10 million American households and 400,000 schools and child care centers lack safe drinking water. Under the Infrastructure Investment and Jobs Act, based on the traditional state revolving fund formula, Alabama will expect to receive \$782 million over five years to improve water infrastructure across the state and ensure that clean, safe drinking water is a right in all communities. The bill also includes \$23 billion nationally for the bipartisan Drinking Water and Wastewater Infrastructure Act.

The Bipartisan Infrastructure Investment and Jobs Act will also:

Create Millions of Good-Paying Jobs - Together with the Build Back Better Act, the Infrastructure Investment and Jobs Act will create an average of 2 million jobs per year over the course of the next decade.

Repair and Rebuild Alabama's Roads and Bridges - The Infrastructure Investment and Jobs Act is the single largest dedicated bridge investment since the construction of the interstate highway system. Based on formula funding alone, Alabama would expect to receive:

\$5.2 billion for federal-aid highway apportioned programs

\$225 million for bridge replacement and repairs under the Infrastructure Investment and Jobs Act over five years.

Alabama can also compete for the \$12.5 billion Bridge Investment Program for economically significant bridges and nearly \$16 billion of national funding in the bill dedicated for major projects that will deliver substantial economic benefits to communities.

Connect Every Alabamian to High-speed Internet - Broadband internet is necessary for Albamians to do their jobs, participate equally in school learning, health care, and to stay connected. Yet 18% of Alabama households do not have an internet subscription, and 11.5% of Alabama residents live in areas where, under the FCC's benchmark, there is no broadband infrastructure. Under the Infrastructure Investment and Jobs Act, Alabama will receive a minimum allocation of \$100 million to help provide broadband coverage across the state, including providing access to the at least 565,000 Alabamians who currently lack it. It also makes 1,518,000 Alabamians (31%) eligible for the Affordability Connectivity Benefit, which will help low-income families afford internet access.

Improve Healthy, Sustainable Transportation Options - Alabamians who take public transportation spend an extra 66.2% of their time commuting and non-White households are 4.5 times more likely to commute via public transportation. 25% of transit vehicles in the state are past useful life. Based on formula funding alone, Alabama would expect to receive more than \$400 million over five years under the Infrastructure Investment and Jobs Act to improve public transportation options across the state.

Invest in the Future of Electric Vehicle (EV) Travel in Alabama - The bill will build a network of EV chargers to facilitate long-distance travel and provide convenient charging options. The U.S. market share of plug-in electric vehicle (EV) sales is only one-third the size of the Chinese EV market. The bill invests \$7.5 billion to build out the first-ever national network of EV chargers in the United States and is a critical element in the Biden-Harris Administration's plan to accelerate the adoption of EVs to address the climate crisis and support domestic manufacturing jobs. Under the Infrastructure Investment and Jobs Act, Alabama would expect to receive \$79 million over five years to support the expansion of an EV charging network in the state. Alabama will also have the opportunity to apply for the \$2.5 billion in grant funding dedicated to EV charging in the bill.

Improve Alabama's Airports - The United States built modern aviation, but our airports lag far behind our competitors. Under the Infrastructure Investment and Jobs Act, airports in Alabama would receive approximately \$140 million for infrastructure development for airports over five years.

Protect Alabama's Infrastructure from Climate Change and Cyber Attacks - The bill will prepare more of Alabama's infrastructure for the impacts of climate change, cyber-attacks, and extreme weather events. From 2010 to 2020, Alabama has experienced 38 extreme weather events, costing the state up to \$20 billion in damages. Under the Infrastructure Investment and Jobs Act, based on historical formula funding levels, Alabama will expect to receive:

\$23 million over five years to protect against wildfires; and

\$19 million to protect against cyberattacks.

Alabamans will also benefit from the bill's historic \$3.5 billion national investment in weatherization which will reduce energy costs for families.

Rep. Sewell, Larson Introduce Landmark Bill to Protect, Strengthen, and Expand Social Security

U.S. Rep. Terri Sewell (AL-07) joined House Ways and Means Social Security Subcommittee Chairman John B. Larson (CT-01) to introduce Social Security 2100: A Sacred Trust. This landmark legislation would enhance Social Security benefits for the first time in 50 years, providing a benefit bump for beneficiaries, improving the cost of living formula, and providing credits for those who take time out of the workforce to care for a loved one. The bill is completely paid for by asking top earners to pay their fair share. Rep. Sewell joined Chairman Larson for a press conference today announcing the bill's introduction which can be viewed here.

"As a proud member of the Ways and Means Social Security Subcommittee, I know that Social Security is a critical lifeline for so many hard-working Americans in Alabama's 7th district and across this nation,"

said Rep. Sewell. "We should not only protect it, but improve it and expand it. With this bill, Social Security 2100, we're ensuring that every worker can retire with dignity after a lifetime of work."

"Social Security 2100: A Sacred Trust combines the best of the previous year's Social Security 2100 Act with President Biden's proposals to expand benefits and strengthen Social Security. The pandemic has only underscored what we already knew and has exacerbated systemic inequities -- current benefits are not enough! 5 million seniors are living in poverty due to longstanding discrimination in the labor force that affects mostly people of color and women. These are our mothers, fathers, aunts, uncles, and neighbors. For too long, Congress has forsaken its duty to enhance benefits. It's time that we act now," said House Ways and Means Social Security Subcommittee Chairman and lead sponsor John Larson.

Social Security 2100 Increases Benefits:

Benefit bump for current and new beneficiaries – Provides an increase for all beneficiaries that is the equivalent to about 2% of the average benefit. The US faces a retirement crisis and a modest boost in benefits strengthens the one leg of the retirement system that is universal and the most reliable.

Protection against inflation – Improves the annual cost-of-living adjustment (COLA) formula to better reflect the costs incurred by seniors through adopting a CPI-E formula. This provision will help seniors who spend a greater portion of their income on health care and other necessities. Improved inflation protection will especially help older retirees and widows who are more likely to rely on Social Security benefits as they age.

Protects low-income workers – No one who paid into the system over a lifetime should retire into poverty. The new minimum benefit will be set at 25% above the poverty line and would be tied to wage levels to ensure that the minimum benefit does not fall behind.

Social Security 2100 Strengthens the Trust Fund

Have millionaires and billionaires pay the same rate as everyone else – Presently, payroll taxes are not collected on wages over \$142,800. This legislation would apply the payroll tax to wages above \$400,000. This provision would only affect the top 0.4% of wage earners.

Extends the depletion date (when a 20% cut to benefits would occur) to 2038 – Giving Congress more time to ensure long term solvency of the Trust Funds.

Social Security Trust Fund Established – Social Security provides all-in-one retirement, survivor, and disability benefits funded through the dedicated FICA contribution paid by workers. There are technically two trust funds, Old-Age and Survivors (OASI) and Disability Insurance (DI), that are usually referred to as the Social Security Trust Fund. This provision combines the OASI & DI trust funds into one Social Security Trust Fund, to ensure that all benefits will be paid.

Social Security 2100 also:

Improves benefits for widows and widowers in two income households.

Repeals the Windfall Elimination Provision (WEP) and Government Pension Offset (GPO) that currently penalize many public servants.

Ends the 5-month waiting period to receive disability benefits.

Extends dependent benefits for students through age 26 and includes part-time students.

Increases access to benefits for children who live with grandparents or other relatives.

Rep. Sewell Sends Letter to Federal Railroad Administration Urging Action on Blocked Railroad Crossings, Requests Visit from DOT Secretary Buttigieg

U.S. Rep. Terri Sewell (AL-07) sent a letter to Federal Railroad Administration (FRA) Deputy Administrator Amit Bose urging swift action to address blocked railroad crossings in Alabama's 7th Congressional District. She also sent a letter to U.S. Secretary of Transportation Pete Buttigieg inviting him to visit the district to see first-hand how rail crossing blockages impact small businesses, students, and community members. The letters are the latest of Rep. Sewell's ongoing efforts to address blocked railroad crossings which have plagued the 7th District for years.

"Our communities in the 7th District continue to suffer from unacceptable train blockages that put public safety at risk and make life more difficult for my constituents," said Rep. Sewell. "I am working with the Biden Administration to find long-term solutions at the federal level, but in the meantime, swift action is urgently needed to solve the current crisis. It is my hope that continued cooperation on the federal, state, and local level will prompt much-needed action."

In December 2019, the FRA launched a Blocked Crossing Incident Reporter website where the public and law enforcement can report the date, time, location, and duration that a crossing was blocked. The agency intends to use the data collected to achieve a better understanding of the location, duration, and impacts of blocked crossings.

In 2018, Rep. Sewell co-authored a letter to the Government Accountability Office (GAO) requesting a report on the impact of longer freight trains and blocked railroad crossings. A number of recommendations from the resulting GAO report were included in President Biden's bipartisan Infrastructure Investment and Jobs Act, which passed the House of Representatives on Friday, November 5th, 2021. Rep. Sewell was also a strong advocate for the rail funding in the legislation, which includes \$5 billion for rail improvements and safety grants, as well as the \$3 billion for grade crossing safety improvements to help resolve the rail crossing blockages that have impacted underserved communities for too long.

President Biden's Bipartisan Infrastructure Investment and Jobs Act contains several provisions that address blocked railroad crossings:

The Railroad Crossing Elimination Program - This section would authorize \$500 million a year for the new Railroad Crossing Elimination grant program. This includes a small set-aside to carry out a highway-rail grade crossing safety information and education program.

Blocked Crossing Portal - This section would require the Federal Railroad Administration to establish a blocked crossing portal to collect information about blocked highway-rail grade crossings from the public. The Federal Railroad Administration is to use the information to assess the impact of blocked crossings, inform outreach to communities and railroads about blocked crossings, and produce an annual report on the program. This pilot program will expire three years after enactment.

National Academies Study on Trains Longer Than 7,500 Feet -This section requires the Secretary to spend between \$1 million and \$2 million on a report by the National Academies on the operations, safety, and efficiency of trains longer than 7,500 feet, to be submitted to relevant Congressional committees within two years.

Railroad point of contact for public safety issues - This section would require all railroads to provide contact information on a public website so that the public could report public safety issues to the railroad.

Rep. Sewell Votes for Largest Investment in U.S. <u>Infrastructure in Nearly a Century</u>

U.S. Rep. Terri Sewell (AL-07) voted to pass President Biden's historic Bipartisan Infrastructure Investment and Jobs Act, the largest investment in U.S. infrastructure in nearly a century. This legislation will create millions of good-paying jobs, repair Alabama's crumbling roads and bridges, expand access to high-speed affordable internet, and make transformational investments in Alabama's drinking water and wastewater infrastructure. The bill's many provisions will supercharge America's global competitiveness and put our nation back on track to have world class infrastructure. The bill passed the House of Representatives today by a vote of 228-206 and will now make its way to President Biden's desk to be signed into law.

"Today we've made history!" said Rep. Sewell. "Thanks to President Biden and Congressional Democrats, the United States Congress has passed the largest investment in our nation's infrastructure in nearly a century. With today's vote, President Biden has accomplished what previous administrations have been trying to do for decades."

"Alabama's infrastructure has been falling behind for far too long," continued Sewell. "The Infrastructure Investment and Jobs Act contains transformational provisions that will revitalize the 7th District by creating

good paying jobs, fixing our crumbling roads and bridges, expanding access to broadband, and finally addressing our broken water infrastructure. I fought to ensure that equity is a central focus of this bill, and I'm proud that it will uplift hard-working Alabamians from our biggest cities to our most rural communities."

"I want to thank Representative Sewell for her hard work passing the bipartisan Infrastructure Investment and Jobs Act," said U.S. Secretary of Commerce Gina Raimondo. "For too long we've neglected investments in critical areas that directly impact American workers, American businesses and American families. One of the many historic investments in this bill is the effort to bridge the digital divide and ensure all Americans have access to reliable, affordable broadband. Broadband is not a luxury, it's a necessity. Thanks to President Biden's vision and the Congresswoman's tireless effort to get this passed, we can now bring affordable broadband to every community in Alabama."

The Bipartisan Infrastructure Investment and Jobs Act will:

Create Millions of Good-Paying Jobs - Together with the Build Back Better Act, the Infrastructure Investment and Jobs Act will create an average of 2 million jobs per year over the course of the next decade.

Repair and Rebuild Alabama's Roads and Bridges - The Infrastructure Investment and Jobs Act is the single largest dedicated bridge investment since the construction of the interstate highway system. Based on formula funding alone, Alabama would expect to receive:

\$5.2 billion for federal-aid highway apportioned programs

\$225 million for bridge replacement and repairs under the Infrastructure Investment and Jobs Act over five years.

Alabama can also compete for the \$12.5 billion Bridge Investment Program for economically significant bridges and nearly \$16 billion of national funding in the bill dedicated for major projects that will deliver substantial economic benefits to communities.

Connect Every Alabamian to High-speed Internet - Broadband internet is necessary for Alabamians to do their jobs, participate equally in school learning, health care, and to stay connected. Yet 18% of Alabama households do not have an internet subscription, and 11.5% of Alabama residents live in areas where, under the FCC's benchmark, there is no broadband infrastructure. Under the Infrastructure Investment and Jobs Act, Alabama will receive a minimum allocation of \$100 million to help provide broadband coverage across the state, including providing access to the at least 565,000 Alabamians who currently lack it. It also makes 1,518,000 Alabamians (31%) eligible for the Affordability Connectivity Benefit, which will help lowincome families afford internet access.

Make Transformational Investments in Alabama's Water Infrastructure - Currently, up to 10 million American households and 400,000 schools and child care centers lack safe drinking water. Under the Infrastructure Investment and Jobs Act, based on the traditional state revolving fund formula, Alabama will expect to receive \$782 million over five years to improve water infrastructure across the state and ensure

that clean, safe drinking water is a right in all communities. The bill also includes \$23 billion nationally for the bipartisan Drinking Water and Wastewater Infrastructure Act.

Address Railroad Crossing Blockages - The Infrastructure Investment and Jobs Act contains several provisions that would address the continued impact of blocked railroad crossings in Alabama and across the nation.

The Railroad Crossing Elimination Program - This section would authorize \$500 million a year for the new Railroad Crossing Elimination grant program. This includes a small set-aside to carry out a highway-rail grade crossing safety information and education program.

Blocked Crossing Portal - This section would require the Federal Railroad Administration to establish a blocked crossing portal to collect information about blocked highway-rail grade crossings from the public. The Federal Railroad Administration is to use the information to assess the impact of blocked crossings, inform outreach to communities and railroads about blocked crossings, and produce an annual report on the program. This pilot program will expire three years after enactment.

National Academies Study on Trains Longer Than 7,500 Feet - This section requires the Secretary to spend between \$1 million and \$2 million on a report by the National Academies on the operations, safety, and efficiency of trains longer than 7,500 feet, to be submitted to relevant Congressional committees within two years.

Railroad point of contact for public safety issues - This section would require all railroads to provide contact information on a public website so that the public could report public safety issues to the railroad.

Improve Healthy, Sustainable Transportation Options - Alabamians who take public transportation spend an extra 66.2% of their time commuting and non-White households are 4.5 times more likely to commute via public transportation. 25% of transit vehicles in the state are past useful life. Based on formula funding alone, Alabama would expect to receive more than \$400 millionover five years under the Infrastructure Investment and Jobs Act to improve public transportation options across the state.

Invest in the Future of Electric Vehicle (EV) Travel in Alabama - The bill will build a network of EV chargers to facilitate long-distance travel and provide convenient charging options. The U.S. market share of plug-in electric vehicle (EV) sales is only one-third the size of the Chinese EV market. The bill invests \$7.5 billion to build out the first-ever national network of EV chargers in the United States and is a critical element in the Biden-Harris Administration's plan to accelerate the adoption of EVs to address the climate crisis and support domestic manufacturing jobs. Under the Infrastructure Investment and Jobs Act, Alabama would expect to receive \$79 million over five years to support the expansion of an EV charging network in the state. Alabama will also have the opportunity to apply for the \$2.5 billion in grant funding dedicated to EV charging in the bill.

Improve Alabama's Airports - The United States built modern aviation, but our airports lag far behind our competitors. Under the Infrastructure Investment and Jobs Act, airports in Alabama would receive approximately \$140 million for infrastructure development for airports over five years.

Protect Alabama's Infrastructure from Climate Change and Cyber Attacks - The bill will prepare more of Alabama's infrastructure for the impacts of climate change, cyber attacks, and extreme weather events.

From 2010 to 2020, Alabama has experienced 38 extreme weather events, costing the state up to \$20 billion in damages. Under the Infrastructure Investment and Jobs Act, based on historical formula funding levels, Alabama will expect to receive:

\$23 million over five years to protect against wildfires; and

\$19 million to protect against cyberattacks.

Alabamans will also benefit from the bill's historic \$3.5 billion national investment in weatherization which will reduce energy costs for families.

ANNOUNCEMENTS

GRANT ALERT!

FY2021 Historic Preservation Fund- African American Civil Rights- History
Grants CFDA 15.904

The National Park Service's (NPS) African American Civil Rights Grant Program (AACR) will document, interpret, and preserve the sites and stories related to the African American struggle to gain equal rights as citizens as well as the transatlantic slave trade. The NPS 2008 report, Civil Rights in America, A Framework for Identifying Significant Sites, will serve as a guide in determining the appropriateness of proposed projects and properties. AACR Preservation Grants are funded by the Historic Preservation Fund (HPF), administered by the NPS, and will fund a broad range of history projects for historic sites including survey and inventory, National Register nominations, oral histories and more. Grants are awarded through a competitive process and do not require non-Federal match. There are separate funding announcements for physical preservation projects and for historical research/documentation projects. Funding announcement P21AS00431 is for physical preservation of historic sites only; P21AS00432 is for historical research/documentation/survey/nomination projects. Please ensure you apply under the correct opportunity number for your project. There is a new Historic Equal Rights grant program under P21AS00430 for physical preservation only of sites involved in the struggle for all Americans civil rights. FY2021 Public Law 116-260 provides \$16,750,000 million for the AACR Grant Program.

Deadline: December 1, 2021

FY2021 Historic Preservation Fund- African American Civil Rights- Preservation Grants CFDA 15.904

The National Park Service's (NPS) African American Civil Rights Grant Program (AACR) will document, interpret, and preserve the sites and stories of the full history of the African American struggle to gain equal rights as citizens. The NPS 2008 report, Civil Rights in America, A Framework for Identifying Significant Sites, will serve as a guide in determining the appropriateness of proposed projects and properties. AACR Preservation Grants are funded by the Historic Preservation Fund (HPF), administered by the NPS, and will fund a broad range of preservation projects for historic sites including architectural services, historic structure reports, preservation plans, and physical preservation to structures. Grants are awarded through a competitive process and do not require non-Federal match. There are separate funding announcements for physical preservation projects and for historical research/documentation projects. Funding announcement P21AS00431 is for physical preservation of historic sites only; P21AS00432 is for historical research/documentation/survey/nomination projects. Please ensure you apply under the correct opportunity number for your project. There is a new Historic Equal Rights grant program under P21AS00430 for physical preservation only of sites involved in the struggle for All American's civil rights. FY2021 Public Law 116-260 provides \$16.75 million for the AACR Grant Program.

Deadline: December 1, 2021

W.E.B. Du Bois Program of Research on Reducing Racial and Ethnic Disparities in the Justice System, Fiscal Year 2021 CFDA 16.560

The Department of Justice is committed to advancing work that promotes civil rights, increases access to justice, supports crime victims, protects the public from crime and evolving threats, and builds trust between law enforcement and the community.

Deadline: December 30, 2021

The Southern Leadership for Voter Engagement (SOLVE) Coalition SOLVE Redistricting Adopt-A-Jurisdiction Mini-grant

The Southern Leadership for Voter Engagement (SOLVE) Coalition, with the support of Mary Reynolds Babcock Foundation and others, is excited to announce Redistricting Minigrants for Coalition partners and other grassroots organizers engaging in redistricting advocacy in the South.

Congressional Black Caucus Foundation Scholarships/Internships

For more than three decades the CBCF has awarded scholarships to talented and deserving students. Each year, we award more than 300 scholarships to students that demonstrate leadership ability through exemplary community service and academic talent. Scholarship programs support current or upcoming college students across a variety of disciplines.

CBCF's internship programs prepare college students and young professionals to become principled leaders, skilled policy analysts, and informed advocates by exposing them to the processes that develop national policies and implement them – from Capitol Hill to federal field offices.

COVID-19 Economic Injury Disaster Loan

This loan provides economic relief to small businesses and nonprofit organizations that are currently experiencing a temporary loss of revenue. In response to COVID-19, small business owners, including agricultural businesses, and nonprofit organizations in all U.S. states, Washington D.C., and territories can apply for the COVID-19 Economic Injury Disaster Loan (EIDL). Section I GENERAL GRANT INFORMATION

- Grants and Federal Domestic Assistance Guidance and key resources to help eligible constituents find information on federal grants, loans, and nonfinancial assistance for projects, as well as on private funding. Prepared by the Congressional Research Service for Members of Congress, updated May 2014. Website: http://sewell.house.gov/grant-information/
- A federal grant is an award of financial assistance from a federal agency to a recipient to carry out a public purpose of support or stimulation authorized by a law of the United States. Federal grants are not federal assistance or loans to individuals. A federal grant may not be used to acquire property or services for the federal government's direct benefit. The 26 federal agencies offer over 1,000 grant programs annually in various categories. Website: http://www07.grants.gov/aboutgrants/grants.jsp
- To learn about Federal grant opportunities, register your organization, and receive notices, please visit www.grants.gov. It is the resource for all Federal grants.
- To apply for Federal Grants: http://www.grants.gov/applicants/apply_for_grants.jsp
- Grants.gov Applicant Training Video Need a quick lesson on how to Register, Find, and Apply?
 Watch this short video to get tips on registering with Grants.gov; finding grant opportunities; understanding your search results; and, applying for opportunities.
- To learn about foundation grant opportunities, please visit http://foundationcenter.org/. The Foundation Center is a gateway to information about private funding sources and provides guidelines about how to write a grant proposal. It also provides links to state libraries with grants reference collections and links to other useful Internet websites.

Department of Health and Human Services

SARS-CoV-2 (COVID-19) Program Activities CFDA 93.990

The Office of the Assistant Secretary for Health (OASH) has established the Laboratory and Diagnostics Working Group (LDWG) seeking submissions to a Broad Agency Announcement (BAA) "to prevent, prepare for, and respond to coronavirus, domestically or internationally, for necessary expenses to research, develop, validate, manufacture, purchase, administer, and expand capacity for COVID–19 tests to effectively monitor and suppress COVID–19..." (Paycheck Protection Program and Healthcare Enhancement Act (P.L. 116-139)). OASH/LDWG seeks proposals for projects that will further enable the coordination and development of testing and associated products that meet the current and future needs, and the effective transition of technology into broad use without impediments. The primary areas of focus should specifically include (1) Scaling and Networking of Technologies, and (2) Testing Demonstrations & Technical Assistance. Specifically, OASH is interested in submissions that will substantially increase our testing capacity and quality in the near term, and do not fall within the scope of other HHS programs.

When posted, the funding opportunity announcement (FOA) will provide guidance for applicants on the submission of short white papers, which after review, may be followed by full proposal submissions for consideration for funding. Applicants will have the option of forgoing the white paper submission for direct submission of a full proposals. Applications will be accepted and reviewed on a rolling basis to address immediate public needs. Applicants must submit white papers and applications through Grants.gov according to the instructions in the FOA. Applicants must have an active SAM registration at the time of submission and maintain an active registration throughout the review process and during any award that may result.

BACKGROUND: On January 31, 2020, HHS Secretary Alex M. Azar II declared a public health emergency in response to the 2019 novel coronavirus, now known as SARS-CoV-2, or COVID-19. Testing is vital to prevent and contain outbreaks that may occur as economic and social activities expand across the country. Accordingly, the Paycheck Protection Program and Healthcare Enhancement Act (P.L. 116-139) provides funding to HHS to "to prevent, prepare for, and respond to coronavirus, domestically or internationally, for necessary expenses to research, develop, validate, manufacture, purchase, administer, and expand capacity for COVID–19 tests to effectively monitor and suppress COVID–19..." As part of the response to this requirement, and in order to administer agency actions to mitigate the pandemic, the Office of the Assistant Secretary for Health (OASH) Laboratory and Diagnostics Working Group (LDWG) complements existing efforts within the Department. To meet current and future challenges with the least possible risk, the nation needs more testing - with increasingly diverse, accurate, and affordable platforms – that are tailored to specific use cases.

Deadline: TBD

Announcement to Support Novel, High-Impact Studies Evaluating Health System and Healthcare Professional Responsiveness to COVID-19 (CFDA 93.226)

The health systems research community should prepare to submit applications to AHRQ to fund critical research focused on evaluating topics such as innovations and challenges encountered in the rapid expansion of telemedicine in response to COVID-19, effects on quality, safety, and value of health system response to COVID-19, and the role of primary care practices and professionals during the COVID-19 epidemic. AHRQ is particularly interested in understanding how digital health innovations contributed to health system and healthcare professional innovation and challenges and solutions to meeting the needs of vulnerable populations including older adults, people living with multiple chronic conditions, rural communities, and uninsured and underinsured populations.

END COVID-19 SECTION

Corporation for National and Community Service

Americorps NCCC Traditional

If you are interested in applying to sponsor an NCCC team, please complete a Project Concept Form. Follow the guidance provided in the Project Concept Form and Applications Instructions document to fill out and complete the Project Concept Form and submit it to your Regional Office with a digital signature.

Deadline: December 31, 2021

Americorp NCCC Traditional Disaster Response

If you are interested in applying to sponsor an AmeriCorps NCCC team in order to participate in a response to a recent disaster, please complete the Project Application for Disaster Response. No Project Concept Form is required. Follow the guidance provided in the Project Application for Disaster Response Instructions document to fill out and complete the Project Application for Disaster Response. Submit this completed application to your Regional Office, with a digital signature, for consideration.

Deadline: December 31, 2021

Americcorps NCCC FEMA Corps

The FEMA Corps Section Office is located at FEMA Headquarters in Washington, DC. If you are a representative of an office within the Federal Emergency Management Agency (FEMA) interested in hosting an AmeriCorps FEMA Corps team to support capacity building efforts, please contact the FEMA Corps Section directly to submit a service project application.

Deadline: December 31, 2021

Environmental Protection Agency

NATIONAL PRIORITIES: INNOVATIVE SAMPLING DESIGNS FOR PUBLIC HEALTH SURVEILLANCE OF CORONAVIRUSES AND OTHER PATHOGENS IN WASTEWATER CFDA 66.511

The COVID-19 pandemic has highlighted the need for effective tools to monitor the emergence and spread of infectious diseases. The U.S. Environmental Protection Agency (EPA) is seeking applications proposing innovative research to inform effective wastewater sampling network designs which allow for early detection and can provide evidence of spread of infection from national to local levels in a form that can be readily used by public health agencies nationwide to address current and future epidemics/pandemics. Wastewater sampling has been widely deployed during the pandemic as a cost-effective, screening-level approach to assess infection levels in the community. In addition to improved analytical detection methods and understanding of pathogen fate and transport in sewer systems, advancing wastewater-based monitoring will require well-designed sampling networks and public health data integration approaches.

Deadline: December 15, 2021

Institute of Museum and Library Services

National Aeronautics and Space Administration

ROSES 2021: Payloads and Research Investigations on the Surface of the Moon CFDA 43.001

The National Aeronautics and Space Administration (NASA) Science Mission Directorate (SMD) released its annual omnibus Research Announcement (NRA), Research Opportunities in Space and Earth Sciences (ROSES) – 2021 (OMB Approval Number 2700-0092, CFDA Number 43.001) on February 12, 2021. In this case "omnibus" means that this NRA has many individual program elements, each with its own due dates and topics. All together these cover the wide range of basic and applied supporting research and technology in space and Earth sciences supported by SMD. Awards will be made as grants, cooperative

agreements, contracts, and inter- or intra-agency transfers, depending on the nature of the work proposed, the proposing organization, and/or program requirements. However, most extramural research awards deriving from ROSES will be grants, and many program elements of ROSES specifically exclude contracts, because contracts would not be appropriate for the nature of the work solicited. The typical period of performance for an award is three years, but some programs may allow up to five years and others specify shorter periods. In most cases, organizations of every type, Government and private, for profit and not-for-profit, domestic and foreign (with some caveats), may submit proposals without restriction on teaming arrangements. Tables listing the program elements and due dates, the full text of the ROSES-2021 solicitation, and the "Summary of Solicitation" as a stand-alone document, may all be found NSPIRES at http://solicitation.nasaprs.com/ROSES2021.

This synopsis is associated with one of the individual program elements within ROSES, but this is a generic summary that is posted for all ROSES elements. For specific information on this particular program element download and read the PDF of the text of this program element by going to Tables 2 or 3 of this NRA at http://solicitation.nasaprs.com/ROSES2021table2 and http://solicitation.nasaprs.com/ROSES2021table3, respectively, click the title of the program element of interest, a hypertext link will take you to a page for that particular program element. On that page, on the right side under "Announcement Documents" the link on the bottom will be to the PDF of the text of the call for proposals. For example, if one were interested in The Lunar Data Analysis Program (NNH21ZDA001N-LDAP) one would follow the link to the NSPIRES page for that program element and then to read the text of the call one would click on "C.8 Lunar Data Analysis (.PDF)" to download the text of the call. If one wanted to set it into the context of the goals, objectives and know the default rules for all elements within Appendix C, the planetary science division, one might download and read "C.1 Planetary Science Research Program Overview (.PDF)" from that same page. While the letters and numbers are different for each element within ROSES (A.12, B.7, etc.) the basic configuration is always the same, e.g., the letter indicates the Science Division (A is Earth Science, B is Heliophysics etc.) and whatever the letter, #1 is always the overview..

Deadline: December 20, 2021

NASA Innovative Advanced Concepts (NIAC) Phase II CFDA 43.013

:

The National Aeronautics and Space Administration (NASA) Headquarters, anticipates a release of a solicitation, titled "NASA Innovative Advanced Concepts (NIAC), Phase II," as an Appendix to the Space Technology Mission Directorate (STMD) NASA Research Announcement (NRA), titled "Space Technology Research, Development, Demonstration, and Infusion-2022 (SpaceTech-REDDI-2022)," on or about October 14, 2021. Once the Appendix is posted, complete details (to include due dates) can be accessed via the following steps:

- 1. Open the NSPIRES homepage at http://nspires.nasaprs.com/
- 2. Select "Solicitations"
- 3. Select "Open"
- 4. Select "Space Technology Research, Development, Demonstration, and Infusion 2022 (SpaceTech-REDDI-2022) 80HQTR22NOA01"
- 5. Select "List of Open Program Elements"
- 6. Select "NASA Innovative Advanced Concepts (NIAC), Phase II-80HQTR22NOA01-22NIAC_A2"
- 7. Select "NASA Innovative Advanced Concepts (NIAC) Phase II Solicitation Document" under Announcement Documents.

The NASA Innovative Advanced Concepts (NIAC) Program currently supports innovative research through multiple phases of study. Phase I awards are nine-month efforts to explore the overall feasibility and viability of visionary concepts. Phase II awards are for up to two years, to further develop the most promising Phase I concepts, and to explore potential infusion options within NASA and beyond. Phase III awards are designed to strategically advance and transition the most promising NIAC Phase II concepts to other NASA programs, other government agencies, or commercial partners.

All NIAC Phase I Fellows or their designees are eligible to submit Phase II proposals based on their Phase I study, provided that they have submitted a Phase I final report by December 15, 2021 and they have not been awarded a Phase II study on that concept. The Phase II proposals must also include Key Findings from the Phase I study. NIAC Fellows or their designees of the predecessor NASA Institute for Advanced Concepts are no longer eligible to submit Phase II proposals based on those prior Phase I studies

Phase I final reports must be submitted before the Phase II proposal. However due to delays caused by Covid-19, many of the current 2021 Phase I final reports are not anticipated until after the 2022 Phase II technical panel review. For those 2021 Phase I Fellows who propose to this solicitation, the Phase I final report must be submitted by January 11, 2022 (5 PM ET). If the Phase I final report is not received by January 11, 2022 (5 PM ET), then the submitted proposal will not be considered for review and selection in the 2022 Phase II. Proposers will need to resubmit to a future NIAC solicitation.

NIAC Principal Investigators (PIs) and team members may be affiliated with any educational institution, commercial or not-for-profit organization, research laboratory, agency, or NASA Center (including the Jet Propulsion Laboratory). Teaming by non-U.S. organizations in proposed efforts is permitted but subject to NASA's policy on foreign participation (see Section 3.3 of the NRA).

Appendix 80HQTR22NOA01-22NIAC_A2 seeks NIAC Phase II awards that will continue the exploration and development of revolutionary advanced concepts started through a NIAC Phase I award. While the Phase I study establishes basic feasibility and clear potential benefit, the Phase II study extends, refines,

and builds upon this foundation. Phase II studies address key remaining unknowns, assumptions, risks, and paths forward. This should explicitly include cost, performance vs. alternatives, development steps and associated schedule, and key enabling technologies. These results aim to provide a sound basis for NASA to consider the concept for further development and a future mission, substantiated with a description of applicable scientific and technical disciplines necessary for development.

All proposals must be submitted electronically through NSPIRES by an authorized organizational representative (AOR). Detailed submission instructions are provided in the SpaceTech-REDDI-2022 NRA, as well as the Guidebook for Proposers Responding to a NASA Notice of Funding Opportunity (NOFO) (https://www.nasa.gov/sites/default/files/atoms/files/may_2021_ed._nasa_guidebook_for_proposers.pdf, dated April 2021). Potential proposers and their proposing organizations are urged to familiarize themselves with the submission system, ensure they are registered in NSPIRES, and submit the required proposal materials well in advance of the deadline.

Deadline: December 15, 2021

ROSES 2021: Land-Cover/Land-Use Change: SARI Synthesis CFDA 43.001

The National Aeronautics and Space Administration (NASA) Science Mission Directorate (SMD) released its annual omnibus Research Announcement (NRA), Research Opportunities in Space and Earth Sciences (ROSES) – 2021 (OMB Approval Number 2700-0092, CFDA Number 43.001) on February 12, 2021. In this case "omnibus" means that this NRA has many individual program elements, each with its own due dates and topics. All together these cover the wide range of basic and applied supporting research and technology in space and Earth sciences supported by SMD. Awards will be made as grants, cooperative agreements, contracts, and inter- or intra-agency transfers, depending on the nature of the work proposed, the proposing organization, and/or program requirements. However, most extramural research awards deriving from ROSES will be grants, and many program elements of ROSES specifically exclude contracts, because contracts would not be appropriate for the nature of the work solicited. The typical period of performance for an award is three years, but some programs may allow up to five years and others specify shorter periods. In most cases, organizations of every type, Government and private, for profit and not-forprofit, domestic and foreign (with some caveats), may submit proposals without restriction on teaming arrangements. Tables listing the program elements and due dates, the full text of the ROSES-2021 solicitation, and the "Summary of Solicitation" as a stand-alone document, may all be found NSPIRES at http://solicitation.nasaprs.com/ROSES2021

This synopsis is associated with one of the individual program elements within ROSES, but this is a generic summary that is posted for all ROSES elements. For specific information on this particular program element download and read the PDF of the text of this program element by going to Tables 2 or 3 of this NRA at http://solicitation.nasaprs.com/ROSES2021table2 and http://solicitation.nasaprs.com/ROSES2021table3, respectively, click the title of the program element of interest, a hypertext link will take you to a page for that particular program element. On that page, on the right side under "Announcement Documents" the link on the bottom will be to the PDF of the text of the call for proposals. For example, if one were interested in The Lunar Data Analysis Program (NNH21ZDA001N-LDAP) one would follow the link to the NSPIRES

page for that program element and then to read the text of the call one would click on "C.8 Lunar Data Analysis (.PDF)" to download the text of the call. Deadline: February 16, 2022

ROSES 2021: Earth Science Applications: Socioeconomic Assessments CFDA 43.001

The National Aeronautics and Space Administration (NASA) Science Mission Directorate (SMD) released its annual omnibus Research Announcement (NRA), Research Opportunities in Space and Earth Sciences (ROSES) – 2021 (OMB Approval Number 2700-0092, CFDA Number 43.001) on February 12, 2021. In this case "omnibus" means that this NRA has many individual program elements, each with its own due dates and topics. All together these cover the wide range of basic and applied supporting research and technology in space and Earth sciences supported by SMD. Awards will be made as grants, cooperative agreements, contracts, and inter- or intra-agency transfers, depending on the nature of the work proposed, the proposing organization, and/or program requirements. However, most extramural research awards deriving from ROSES will be grants, and many program elements of ROSES specifically exclude contracts, because contracts would not be appropriate for the nature of the work solicited. The typical period of performance for an award is three years, but some programs may allow up to five years and others specify shorter periods. In most cases, organizations of every type, Government and private, for profit and not-forprofit, domestic and foreign (with some caveats), may submit proposals without restriction on teaming arrangements. Tables listing the program elements and due dates, the full text of the ROSES-2021 solicitation, and the "Summary of Solicitation" as a stand-alone document, may all be found NSPIRES at http://solicitation.nasaprs.com/ROSES2021.

This synopsis is associated with one of the individual program elements within ROSES, but this is a generic summary that is posted for all ROSES elements. For specific information on this particular program element download and read the PDF of the text of this program element by going to Tables 2 or 3 of this NRA at http://solicitation.nasaprs.com/ROSES2021table2 and http://solicitation.nasaprs.com/ROSES2021table3, respectively, click the title of the program element of interest, a hypertext link will take you to a page for that particular program element. On that page, on the right side under "Announcement Documents" the link on the bottom will be to the PDF of the text of the call for proposals. For example, if one were interested in The Lunar Data Analysis Program (NNH21ZDA001N-LDAP) one would follow the link to the NSPIRES page for that program element and then to read the text of the call one would click on "C.8 Lunar Data

Analysis (.PDF)" to download the text of the call. If one wanted to set it into the context of the goals, objectives and know the default rules for all elements within Appendix C, the planetary science division, one might download and read "C.1 Planetary Science Research Program Overview (.PDF)" from that same page. While the letters and numbers are different for each element within ROSES (A.12, B.7, etc.) the basic configuration is always the same, e.g., the letter indicates the Science Division (A is Earth Science, B is Heliophysics etc.) and whatever the letter, #1 is always the overview.

Deadline: March 22, 2022

National Archives and Records Administration

State Board Programming Grants CFDA 89.003

The National Historical Publications and Records Commission seeks proposals that support the work of state historical records advisory boards through projects that engage the public, expand civic education, and promote understanding of the nation's history, democracy, and culture.

The Commission welcomes projects that commemorate the 250th anniversary of the Declaration of Independence and that use collections to examine the ideals behind the founding of the United States and the continual interpretation and debate over these ideals over the past 250 years. Collections that center the voices and document the history of Black, Indigenous, and People of Color are especially encouraged.

The purpose of this grant program is to assist state boards to broaden preservation of, and increased online access to, historical records; develop and promote best practices; support activities that put the American people in touch with primary sources in their communities and online; promote the institutional advancement of organizations in underserved communities; and assist locally based repositories with training and tools to improve their stewardship abilities. The Commission will award grants to state historical records advisory boards to:

- ? Operate state-based regrant programs that preserve historical records and make them available online
- ? Carry out traveling archivist programs that provide onsite assistance and follow-up advice to repositories
- ? Provide educational and outreach programs, workshops, and other activities that enhance citizen and student engagement with historical records
- ? Offer scholarships, training opportunities, and other programs that support institutional advancement among records repositories, especially those in underserved communities

- ? Collaborate on projects with other organizations to address common problems or shared opportunities within a state or among a consortium of state archives
- ? Hold or participate in meetings and public forums on statewide or national archival issues.

State boards should review the NHPRC's strategic plan and consider its goals, objectives, and tactics when evaluating the board's current programming and considering new programs. Some tactics call on the NHPRC to partner with state boards to undertake particular activities, and other tactics relate to activities that are already common among state boards. Applications that outline programs that address the following tactics, and others that relate to the work of the state boards, will be more competitive:

- ? Target institutional advancement for small and underserved local archives and repositories, including Historically Black Colleges and Universities, Hispanic-Serving Institutions, Minority-Serving Institutions, and tribal entities.
- ? Develop outreach strategies to historical records collections that center the voices and perspectives of African Americans, Asian Americans, Hispanic Americans, and Native Americans.
- ? Support opportunities for Black, Indigenous, and People of Color in professional development as archivists.
- ? Offer workshops through a variety of sponsors to educate potential applicants about project design and the NHPRC application process.
- ? Implement local and statewide projects that enhance public participation and engagement in the work of archives.

Projects utilizing traditional approaches with a proven record of success, as well as projects testing innovative approaches, are welcome. All applications should outline a process for contacting institutions and individuals who participate in the board's programs (i.e., regrant and training scholarship recipients, workshop attendees, etc.) to determine how they benefited. Applications should also outline a process for evaluating the board's programs, determining their effectiveness, and proposing appropriate changes.

For a comprehensive list of Commission limitations on funding, please see: "What we do and do not fund" (http://www.archives.gov/nhprc/apply/eligibility.html). Applications that consist entirely of ineligible activities will not be considered.

State boards, as well as state archives, are encouraged to consider also applying under the Commission's Archival Collaboratives: Planning and Implementation Grants program. Funding from this program can be

used to build on the current efforts of state archives and state boards to address the needs of small and underrepresented archives; utilize best practices, tools, and techniques; and implement management structures that will promote long-term sustainability and growth.

This program can provide the funding necessary to support the staffing, consultants, travel, and other expenses related to the development of archival collaboratives within the state or among several states. The development of collaboratives will provide a mechanism for repositories to work together on a continuing basis to expand on what they have learned through a regrant project, a workshop, or some other program opportunity. These collaboratives can also be used to expand the capabilities of institutions so that they are in a position to apply for a regrant or for funding directly from the NHPRC, either individually or as a collaborative.

Award Information

The Commission offers two levels of funding. A Level I grant is for one year and for up to \$12,000. A Level II grant is for one year and for up to \$40,000 or for two years and for up to \$80,000. Applicants may request either Level I or Level II funding, but not both. The Commission expects to make up to a total of 30 grants in this category for a total of up to \$800,000. Grants begin no earlier than January 1, 2023.

The Commission requires that grant recipients acknowledge NHPRC grant assistance in all publicity, publications, and other products that result from its support.

Eligibility

These grants are awarded only to state historical records advisory boards in each state, or to the state agency responsible for the state board, ordinarily the state archives. Another state agency, or a non-profit organization, such as a foundation or university, acting on behalf of the designated state agency may apply. States also include the District of Columbia, the Commonwealth of Puerto Rico, and United States territories.

Projects must include at least one of the eligible activities described for the program. Applicants must include all required elements (SF 424, Narrative, NHPRC Budget Form, and Supplemental Materials). Applications that do not meet either of these criteria will not be considered.

In order to ensure eligibility, applicants should first review the rules and regulations governing NHPRC grants under the Administering an NHPRC Grant section.

Cost Sharing

The total costs of a project are shared between the NHPRC and the applicant organization.

Cost sharing is required. The applicant's financial contribution may include both direct and indirect expenses, in-kind contributions, non-Federal third-party contributions, and any income earned directly by the project. NHPRC grant recipients are not permitted to use grant funds for indirect costs (as indicated in

2 CFR 2600.101). Indirect costs must be listed under the applicant's cost sharing contribution if they are included in the budget.

The Commission provides no more than 75 per cent of total project costs in the State Board Programming Grants category. For example, a request of \$40,000 in NHPRC grant funds means the applicant institution must provide at least \$13,334 in cost share.

Other Requirements

Applicant organizations must be registered in the System for Award Management (SAM) prior to submitting an application, maintain SAM registration throughout the application and award process, and include a valid DUNS number in their application. Details on SAM registration and requesting a DUNS number can be found at the System for Award Management website at https://sam.gov. Please refer to the User Guides section and the Grants Registrations PDF.

Deadline: June 08, 2022

COLLABORATIVES- CFDA 89.003

The National Historical Publications and Records Commission seeks Archives Collaboratives of three or more repositories working together to make their collections more readily available for public discovery and use. The grant program will fund Archives Collaboratives to share best practices, tools, and techniques; assess institutional strengths and opportunities; create replicable and sustainable digital platforms for historical collections; virtually unify records from multiple repositories; and promote management structures for long-term sustainability and growth.

The Commission welcomes collaborations that target institutional advancement for small and underserved local archives and repositories, especially those with collections that focus on the voices and perspectives of Black, Indigenous, and People of Color. Archives Collaboratives must consist of three or more organizations. They may:

- ? be located in the same community, state, or geographic region
- ? be "virtual" or online collaboratives
- ? share affinities among the scope and subject matter of their collections
- ? have similar organizational missions
- ? serve similar types of user communities

Award Information

Applicants may apply for either a Planning Grant or an Implementation Grant. You need not have previously received an NHPRC Planning Grant in order to apply for an Implementation Grant.

Planning Grants are available to plan and develop a working collaborative of three or more partners designed to enhance the capacity of small and diverse organizations with historical records collections. Commitments to the Archives Collaborative should be secured from partners at the time that the application is submitted. Together, the partners would develop a mission, work plan, and timeline to carry out a shared project or develop a shared best practice, tool, or technique that will increase public access to historical records. Applicants are eligible to receive one-year grants up to \$25,000, shared by the consortia, to carry out the project. The NHPRC expects to make up to four grants in this category for up to \$100,000. Applications are due on June 8, 2022, with a start date for implementation of January 1, 2023.

Implementation Grants are available for Archives Collaboratives to put into practice the action items identified during their planning process, whether done independently or through a Planning Grant from the NHPRC. Projects that demonstrate commitments by member organizations to the Archives Collaborative, a work plan, and timeline are eligible to receive one- or two-year grants up to \$100,000, shared by the consortia, to carry out the project. The NHPRC expects to make up to four grants in this category for up to \$400,000.Applications are due on June 8, 2022, with a start date for implementation of January 1, 2023.

The Commission requires that grant recipients acknowledge NHPRC grant assistance in all publications and other products that result from its support.

Eligibility

Eligible applicants:

Nonprofit organizations or institutions

Colleges, universities, and other academic institutions

State or local government agencies

Federally-acknowledged or state-recognized Native American tribes or groups

For a comprehensive list of the Commission's limitations on funding, please see "What we do and do not fund" (http://www.archives.gov/nhprc/apply/eligibility.html). Applications that consist entirely of ineligible activities will not be considered.

In order to ensure eligibility, applicants should first review the rules and regulations governing NHPRC grants under the Administering an NHPRC Grant section.

Cost Sharing

The total costs of a project are shared between the NHPRC and the applicant organization.

Cost sharing is required. The applicant's financial contribution may include both direct and indirect expenses, in-kind contributions, non-Federal third-party contributions, and any income earned directly by the project. Indirect costs must be listed under the applicant's cost sharing contribution. NHPRC grant recipients are not permitted to use grant funds for indirect costs (as indicated in 2 CFR 2600.101). Indirect costs must be listed under the applicant's cost sharing contribution.

The Commission provides no more than 75 percent of total project costs for the Planning and Implementation Grants. For example, a request of \$75,000 in NHPRC grant funds means the applicant institution must provide at least \$25,000 in cost share.

Other Requirements

Applicant organizations must be registered in the System for Award Management (SAM) prior to submitting an application, maintain SAM registration throughout the application and award process, and include a valid DUNS number in their application. Details on SAM registration and requesting a DUNS number can be found at the System for Award Management website at www.sam.gov.

Deadline: June 08, 2022

National Endowment for the Humanities

Media Projects CFDA 45.162

The National Endowment for the Humanities (NEH) Division of Public Programs is accepting applications for the Media Projects program. 41TThe purpose of this program is to support collaboration between media producers and scholars to develop humanities content and to prepare documentary films, radio, and podcasts that engage public audiences with humanities ideas in creative and appealing ways. All projects must be grounded in humanities scholarship. Media Projects awards are made at two levels: Development and Production.

Deadline: January 12, 2022

Institutes for K-12 Educators CFDA 45.163

The National Endowment for the Humanities (NEH) Division of Education Programs is accepting applications for the Institutes for K-12 Educators program. NEH Institutes are professional development programs that convene K-12 educators from across the nation in order to deepen and enrich their understanding of significant topics in the humanities and enrich their capacity for effective teaching and scholarship.

Deadline: February 22, 2022

Landmarks of American History and Culture CFDA 45.163

The National Endowment for the Humanities (NEH) Division of Education Programs is accepting applications for the Landmarks of American History and Culture program. The purpose of this program is to support a series of one-week workshops for K-12 educators across the nation to enhance and strengthen humanities teaching at the K-12 level.

Deadline: February 22, 2022

Fellowships Open Book Program CFDA 45.169

The National Endowment for the Humanities (NEH) Office of Digital Humanities, in partnership with the NEH Division of Research Programs, is accepting applications for the Fellowships Open Book Program. This limited competition aims to award publishers a \$5,500 grant to release open access digital editions of books whose underlying research was funded by one of the following NEH programs: Fellowships; NEH-Mellon Fellowships for Digital Publication; Awards for Faculty at Hispanic-Serving Institutions; Awards for Faculty at Historically Black Colleges and Universities; Awards for Faculty at Tribal Colleges and Universities; Summer Stipends; Fellowships for Advanced Social Science Research on Japan; or Public Scholars. Each e-book will be released under a Creative Commons license, making those books free for anyone to download. The book could be a forthcoming title (to be open access upon first release) or it could be a book that was first released at any time during or after calendar year 2015. NEH-supported books that were reissued or published in new editions during this period are also permitted.

Deadline: November 15, 2022

<u>Innovation Corps - National Innovation Network Teams Program (I-Corps TM Teams) – (CFDA 47.041, 47.049, 47.050, 47.070, 47.074, 47.075, 47.076, 47.079, 47.083)</u>

The National Science Foundation (NSF) seeks to develop and nurture a national innovation ecosystem that builds upon fundamental research to guide the output to facilitate the application of scientific discoveries closer to the development of technologies, products, and processes that benefit society. To maintain, strengthen and grow a national innovation ecosystem, NSF has established the Innovation Corps - National Innovation Network Teams Program (I-Corps Teams). The NSF I-Corps Teams Program's purpose is to identify NSF-funded researchers who will receive additional support in the form of entrepreneurial education, mentoring and funding to accelerate innovation that can attract subsequent third-party funding. The purpose of the I-Corps Teams program is to identify NSF-funded researchers

who will receive additional support in the form of entrepreneurial education, mentoring and funding to accelerate the translation of knowledge derived from fundamental research into emerging products and services that can attract subsequent third-party funding. The outcomes of I-Corps Teams projects will be threefold: 1) a clear go/no go decision based on an assessment of the viability of the overall business model, 2) substantial first-hand evidence for or against a product-market fit, with a pithy definition of the customer segments and corresponding value propositions, and 3) a narrative of a compelling technology demonstration for potential partners. WEBINAR: A webinar will be held monthly to answer questions about this program. Details will be posted on the I-Corps website (see http://www.nsf.gov/news/special_reports/i-corps/program.jsp) as they become available.

Deadline: Proposals accepted at anytime

Cyberinfrastructure for Emerging Science and Engineering Research – (CFDA 41.070)

The Cyberinfrastructure for Emerging Science and Engineering Research (CESER) program aims to catalyze new science and engineering discovery pathways through early-stage collaborative activities between disciplinary scientists and engineers as well as developers/implementers of innovative cyberinfrastructure (CI) capabilities, services, and approaches. Beginning in FY 2017, the CESER program replaced the Strategic Technologies for Cyberinfrastructure (STCI) program. CESER has retained STCI's focus on supporting innovation across the CI ecosystem with increased emphasis on addressing and enabling emerging areas of potentially transformative research, including NSF priority areas, national strategic directions, and international collaborative research. CESER accepts proposals according to this Program Description year-round. From time to time, NSF may also issue Dear Colleague Letters according to CESER to signal special thematic interests and opportunities. CESER employs existing NSF funding mechanisms to accomplish the program's goals such as Early-concept Grants for Exploratory Research (EAGER) and Conference proposals. GUIDANCE TO POTENTIAL PROPOSERS Science/engineering-driven collaboration. A central feature of successful CESER projects is a strong, mutually-dependent collaborative team comprising expertise in the target science/engineering discipline(s) as well as expertise in CI development and implementation. Such a collaborative approach is critical to informing and guiding the development of requirements towards the eventual development and deployment of user-centric innovative CI that fosters new pathways to discovery. Proposals according to CESER should identify and describe the science and engineering goals and rationale, and explain and support the potential for transformative impacts on science/engineering research and broader impacts. Proposals for technical efforts that are not well-tied to identified science and engineering research challenges as well as utilization scenarios are unlikely to be supported. Exploratory and pilot activities. CESER supports early-stage exploratory efforts that may comprise analysis, community planning, and pilot-level activities that are preparatory or informative for eventual future development and deployment of science/engineering-driven CI. Proposals for full-scale technical efforts leading to development/deployment should be directed to other appropriate NSF programs. Integrative and accelerative approaches. Proposals have particularly welcomed that address identified common needs across multiple research disciplines; leverage and accelerate the impact of existing CI investments in resources and services in one or more application domains; aim to reduce barriers to broader adoption of CI-enabled science/engineering approaches, and integrate different aspects and elements of CI to achieve

holistic solutions with transformative science/engineering impact. The requirement to contact NSF Cognizant Program Officers. CESER is an inherently collaborative science/engineering-CI program. Successful CESER projects typically involve co-funding from the relevant disciplinary research programs within NSF. Consequently, before submitting a proposal to CESER, proposers must first (1) discuss their ideas with a cognizant CESER Program Officer to ensure that CESER is the appropriate venue for the proposal and (2) discuss their ideas with the relevant NSF disciplinary science and engineering research program(s) to ensure there is adequate disciplinary interest in the proposed effort. Proposals that have been declined by CESER or any other NSF program may not be resubmitted to CESER without substantial revision. Proposals violating this restriction may be returned without review

Deadline: Proposals accepted anytime

<u>High-Risk Research in Biological Anthropology and Archaeology – (CFDA</u> 47.075)

Anthropological research may be conducted under unusual circumstances, often in distant locations. As a result, the ability to conduct potentially important research may hinge on factors that are impossible to assess from a distance and some projects with potentially great payoffs may face difficulties in securing funding. This program gives small awards that provide investigators with the opportunity to assess the feasibility of an anthropological research project. It is required that the proposed activity be high risk in nature. The information gathered may then be used as the basis for preparing a more fully developed research program. Investigators must contact the cognizant NSF Program Director before submitting an HRRBAA proposal. This will facilitate determining whether the proposed work is appropriate for HRRBAA support.

Deadline: Proposals accepted anytime

<u>Broadening Participation in Engineering – (CFDA 47.041)</u>

NSF seeks to strengthen the future U.S. Engineering workforce by enabling the participation of all citizens through the support of research in the science of Broadening Participation in Engineering (BPE). The BPE program is dedicated to supporting the development of a diverse and well-prepared engineering workforce. BPE focuses on enhancing the diversity and inclusion of all underrepresented populations in engineering, including gender identity and expression, race and ethnicity (African Americans/Blacks, Hispanic Americans, American Indians, Alaska Natives, Native Hawaiians, and Native Pacific Islanders), disability, LGBTQ+, first-generation college, and socio-economic status. BPE funds research to Understand and analyze the systemic barriers that prevent underrepresented groups from pursuing and succeeding in engineering, for example, understand the problem of insufficient interest and poorly sustained participation in engineering across underrepresented demographic groups; insignificant preparation and scarce opportunities for members of underrepresented groups to learn meaningful, relevant engineering content. Understand and analyze factors that enhance our ability to increase access to engineering by creating support systems and social networks that raise career awareness about different

engineering pathways. Develop innovative methods and projects to significantly impact the recruitment and retention of engineering students from underrepresented groups. Activities must be supported by relevant data and have the capability to produce a model that can be replicated in other contexts. Develop innovative methods and projects to aggressively recruit and retain tenure track faculty from underrepresented groups. Design and transform a culture to make diversity, equity, and inclusion a priority in the engineering enterprise. BPE research activities will provide scientific evidence that engineering educators, employers, and policymakers need to make informed decisions to design effective programs that broaden the participation of persons from historically underrepresented groups in the engineering workforce. BPE is interested in funding research that spans K-12 to the workforce and offers the greatest return on investment. BPE funded research should produce outcomes that are scalable, sustainable, and applicable to various contexts, settings, and demographics within the engineering enterprise. BPE is particularly interested in research that employs intersectional approaches in recognition that gender, race, and ethnicity do not exist in isolation from each other and other categories of social identity. BPE is equally interested in research activities that align with and provide meaningful connections to the NSF INCLUDES National Network. The overarching goal of NSF INCLUDES is to achieve a significant impact at scale in transforming STEM education and workforce development by educating a diverse, STEM-capable workforce that includes talented individuals from all sectors of the Nation & apos;s population. Collaborations are encouraged between BPE proposals and existing NSF INCLUDES projects, for example, the NSF INCLUDES Alliances and Coordination Hub, provided these collaborations to strengthen both the BPE and NSF INCLUDES projects. Before submitting a proposal to the BPE program, prospective Principal Investigators are strongly encouraged to speak to the program director to obtain guidance as to whether the proposed ideas are aligned with the strategic goals of the BPE program. Proposal Elements All BPE proposals should Be informed by the current theoretical and scientific literature as well as add to the extant knowledge base. Directly address how the work will broaden the participation of one or more underrepresented populations in engineering. Provide appropriate justification to support the selection of the targeted group(s), with specific and applicable objectives, and demonstrate applicable knowledge of the relevant literature on underrepresentation. Integrate a mechanism to assess and evaluate how well the project has achieved the stated objectives as part of the project management plan. Provide evidence of clear, measurable outcomes and consideration of how the strategy will advance knowledge beyond localized contexts. Incorporate a dissemination plan that goes beyond publishing research papers and presenting at conferences. PIs should think creatively about who needs to hear about the research for it to have an impact and develop a strategy to reach that audience. Describe how the outcomes have the potential to enhance the diversity and inclusion of underrepresented populations in engineering. The Project Summary must contain a list of 3-5 keywords. Place the keywords on a separate line at the end of the Overview section of the Project Summary.

Deadline: Proposals accepted anytime

Critical Aspects of Sustainability – (CFDA 47.041, 47.049, 47.050)

Economic development and human progress have led to a proliferation of manufactured chemicals and materials made from limited resources found in nature (i.e., minerals and metals, petroleum-based products and natural gas). Long-term sustainability requires consideration of the availability of specific natural resources, energy, and water usage. NSF continues to support efforts that seek to improve the

efficiency with which natural resources are used to meet human needs for products and services. Sustainability research encompasses the design, manufacture, and use of efficient, effective, safe and more environmentally-benign products and processes; stimulates innovation across all sectors to design and discover new chemicals and materials, production processes, and product stewardship practices; and, increases performance and value while meeting the goals of protecting and enhancing human health and the environment. This program seeks to support basic research through core disciplinary programs aimed at improving the sustainability of resources for future generations while maintaining or improving current products to offer technologically-advanced, economically competitive, environmentally-benign and useful materials to a global society. To address these challenges, the program aims to identify opportunities for innovation in a wide range of contributing disciplines as well as integrative activities. This program encourages the development of new experimental and theoretical/modeling approaches that will aid in both reductionist and whole-systems approaches. This program welcomes proposals in any area of research supported through the participating divisions that address the topics outlined below. The selected topics are of particular interest to core disciplinary programs in the participating divisions and do not include all funding opportunities and priorities in the area of sustainability at NSF. Proposals are submitted to the relevant core Programs indicated below in the participating Divisions, and all questions regarding proposals should be addressed by the cognizant Program Officers to which submission is contemplated. Proposals should be submitted with the "CAS:" prefix in the title. The Division of Chemistry (CHE/MPS) welcomes proposals to its Disciplinary Research Programs, including Chemical Catalysis (CAT), Chemical Measurement and Imaging (CMI), Chemical Structure, Dynamics and Mechanisms-A (CSDM-A), Chemical Structure Dynamics and Mechanisms-B (CSDM-B), Chemical Synthesis (SYN), Chemical Theory, Models and Computational Methods (CTMC), Chemistry of Life Processes (CLP), Environmental Chemical Sciences (ECS), and Macromolecular, Supramolecular and Nanochemistry (MSN). All proposals must be on the chemical aspects of sustainability. The design, preparation and reactivity studies associated with new catalysts and catalytic processes that employ earthabundant and benign elements and raw materials; advanced catalytic methods for the reduction of dinitrogen to ammonia and water splitting are also invited; Grant Opportunities for Academic Liaison with Industry (GOALI) proposals, where such advances are connected directly to industrial considerations, are also encouraged. Understanding the molecular mechanisms of the two-way communication between the environment and living systems as well as between organisms situated in changing environments; design and test methods that could confer resilience and/or could foster adaptability of living systems subject to changing environments. Innovative measurement and imaging approaches that can improve the efficiency of manufacturing processes, including advances in separation science targeting reduced energy consumption or generation of less waste. Fundamental studies related to sustainable energy such as chromophores based on earth-abundant elements, advanced electrolytes for battery, water splitting, and carbon dioxide conversions. Understanding the environmental chemical degradation of contaminants, including emerging contaminants. Transformative approaches to the efficient and inexpensive synthesis of polymers or nanostructures using renewable feedstocks or earthabundant elements; and innovative research that enhances the understanding of efficient use and recycling of polymers and critical elements or the conversion of energy from renewable sources. The development of new synthetic methods using earth-abundant and inexpensive chemicals, fundamental studies that improve our understanding of rare earth elements; the conversion of non-petroleum-based resources into useful building blocks; and new environmentally-friendly chemical syntheses that improve on current practice by requiring less energy, freshwater, reagents, and/or organic solvents. Other CHE programs also

welcome proposals on this general topic, as long as the proposals fit the scope of the program. All questions regarding proposals to CHE should be addressed to the cognizant Program Officers for the Program to which submission is contemplated (see CHE Program webpages,

https://www.nsf.gov/funding/programs.jsp?org=CHE). The Division of Materials Research (DMR/MPS) welcomes proposals to its Topical Materials Research Programs, including Biomaterials (BMAT), Ceramics (CER), Condensed Matter and Materials Theory (CMMT), Condensed Matter Physics (CMP), Electronic and Photonic Materials (EPM), Metals and Metallic Nanostructures (MMN), Polymers (POL), and Solid State and Materials Chemistry (SSMC). All proposals must be on materials aspects of sustainability and focused on fundamental materials-research approaches, CER, CMMT, EPM, MMN, and SSMC will consider proposals on all materials aspects of sustainability. BMAT encourages proposals that take advantage of synthetic biology or other innovative and sustainable approaches (e.g., renewable, recyclable, environmentally benign). CMP encourages proposals on replacing rare-earth elements in magnetic materials with more abundant and accessible elements; also, proposals exploring materials alternatives to oxides for nuclear reactor fuel, aiming at improved stability and properties (e.g., thermal conductivity) and decreased environmental impact. POL welcomes proposals that address plastics waste accumulation through innovative materials approaches and environmentally benign polymeric materials having properties exceeding those of current commercial plastics. All proposals must be submitted through one of the active solicitations of the DMR Topical Materials Research Programs (currently NSF 17-580, 18-500, and 19-515) and must follow the deadlines, instructions, and limitations of these solicitations. Proposals that are not following these guidelines or that fall outside the scope of DMR and its Topical Materials Research Programs will be returned without review. All questions regarding proposals to DMR should be addressed to the cognizant Program Officers for the Program to which submission is contemplated (see DMR Program webpages,

https://www.nsf.gov/funding/programs.jsp?org=DMR). The Chemical, Bioengineering, Environmental and Transport Systems Division (CBET/ENG) has several core programs that review proposals on research topics related to sustainability, including Molecular Separations (MolS), Biosensing, Environmental Sustainability (EnvS), Biological and Environmental Interactions of Nanoscale Materials (BioNano), Combustion and Fire Systems (CFS), and Particulate and Multiphase Processes (PMP). Within these programs, as noted, the following topics are of particular interest: Understanding the fundamental combustion properties of sustainable aviation fuels under engine relevant conditions. (CFS) Fundamental studies leading to effective methods of processing multiphase fluid systems that minimize waste, avoid contamination, enhance the purity, or lead to novel materials that benefit efficient energy utilization. (PMP) The development of innovative separation mechanisms, mass separating agents, or engineering processes that aim to substantially reduce energy and/or material consumption in the chemical process industries. (MolS) Fundamental mechanistic investigations for the development, sustainable production and use of nanomaterials, nanoparticles, nanodevices, and nanosystems. (BioNano) Biosensing systems with inherent capabilities of artificial intelligence, machine learning, and decision making for applications in real-time monitoring of environmental and living systems and in evaluating environmentally benign chemicals and materials. (Biosensing) Industrial Ecology: Topics of interest in Industrial Ecology include advancements in modeling such as life cycle assessment, materials flow analysis, input/output economic models, and novel metrics for measuring sustainable systems. Innovations in industrial ecology are encouraged. (EnvS) Green Engineering: Research is encouraged to advance the sustainability of manufacturing processes, green buildings, and infrastructure. Improvements in distribution and collection systems that will advance smart growth strategies and ameliorate effects of

growth are supported. Innovations in the management of stormwater, recycling and reuse of drinking water, and other green engineering techniques to support sustainability may also be fruitful areas for research. (EnvS) Ecological Engineering: Topics should focus on the engineering aspects of restoring ecological function to natural systems. Engineering research in the enhancement of natural capital to foster sustainable development is encouraged. (EnvS) Earth Systems Engineering: Earth systems engineering considers aspects of large-scale engineering research that involve mitigation of greenhouse gas emissions, adaptation to climate change, and other global-scale concerns. (EnvS) All questions regarding proposals to CBET should be addressed to the cognizant Program Officers for the participating Program to which submission is contemplated (seeCBET Program webpages, https://www.nsf.gov/funding/programs.jsp?org=CBET). For the Division of Civil, Mechanical, and Manufacturing Innovation (CMMI/ENG), proposals addressing sustainable materials processing are welcome. Of interest are manufacturing processes with reduced use of toxic components, such as solvents, carbon emissions, and pollutants; processes under ambient conditions, as opposed to extreme temperatures, pressures or other harsh conditions; and increased conservation of natural resources, such as water, raw material, and energy. Proposals to CMMI must be submitted to the Advanced Manufacturing (AM) Program and align with the scope of the program. All questions regarding proposals to CMMI should be addressed to the cognizant Program Officers for the participating Program to which submission is contemplated (see CMMI Program webpages, https://www.nsf.gov/funding/programs.jsp?org=CMMI). The Division of Earth Sciences (EAR/GEO) welcomes fundamental and transformational geosciences projects addressing the distribution of Critical Minerals and Materials in the Earth. The following programs in the division support research on this topic: Petrology and Geochemistry (CH), Geobiology and Low-Temperature Geochemistry (GG), and Frontier Research in Earth Sciences (FRES). Topics of particular interest include fundamental studies of the geochemistry of Critical Earth Minerals and Materials (CMM), such as: Identifying new sources of critical minerals on the Earth's surface;

Materials (CMM), such as: Identifying new sources of critical minerals on the Earth's surface; Constraining their pathways in the natural environment involving concentration by Earth and geobiological processes, and Developing methods for sustainable exploration of these CMMs. Studies can be based on laboratory, field, or modeling efforts, and should have a strong emphasis on training the next generation of geoscientists and educating the public on the importance of CMM. Proposals must be submitted through one of the active solicitations of the three programs and must follow the deadlines and guidelines of these solicitations. All questions regarding proposals to EAR should be addressed to the cognizant Program Officers for the participating Program to which submission is contemplated (see EAR Program webpages, https://www.nsf.gov/funding/programs.jsp?org=EAR).

Deadline: Proposals accepted anytime

Small Business Administration

Program for Investment in Microentrepreneurs (PRIME) – CFDA 59.050

SBA intends to award a discretionary grant to the National Association of Government Guaranteed Lenders (NAGGL) to provide SBA 7(a) training to nonprofit lenders participating in the SBA Community Advantage Pilot Loan Program (CA). NAGGL has extensive experience with providing

training to lenders on SBA's 7(a) loan product in the areas of loan origination, loan servicing, and loan liquidation. This discretionary grant will serve as a proof of concept to explore the success of regional training to mission lenders participating in CA. These training needs have been identified by SBA's Office of Credit Risk Management to increase the performance level of lenders participating in the CA program. SBA will work closely with NAGGL in shaping the project as it is implemented and will draw lessons learned from its implementation and use that insight and experience in deciding whether or not to continue the initiative in a permanent form, which we would then do via the standard competitive process for awarding grants.

Deadline: Open

HS 2021-2 Omnibus Solicitation of the NIH, CDC and FDA for Small Business Innovation Research Grant Applications (Parent SBIR [R43/R44] Clinical Trial Not Allowed)

This Funding Opportunity Announcement (FOA), issued by the National Institutes of Health (NIH), the Centers for Disease Control and Prevention (CDC), and the Food and Drug Administration (FDA), invites eligible United States small businesses to submit Small Business Innovation Research (SBIR) grant applications. United States small businesses that have the research capabilities and technological expertise to contribute to the R and D mission(s) of the NIH, CDC, and FDA awarding components identified in this FOA are encouraged to submit SBIR grant applications in response to identified topics (see PHS 2021-2 SBIR/STTR Program Descriptions and Research Topics for NIH, CDC, and FDA. This Parent Funding Opportunity Announcement does not accept clinical trials.

CFDA Number(s): 93.068 -- Chronic Diseases: Research, Control, and Prevention

93.070 -- Environmental Public Health and Emergency Response

93.073 -- Birth Defects and Developmental Disabilities - Prevention and Surveillance

93.083 -- Prevention of Disease, Disability, and Death through Immunization and Control of Respiratory and Related Diseases

93.867 -- Vision Research

93.879 -- Medical Library Assistance

Deadline: April 05, 2022

U.S. Department of Agriculture

Food Safety Outreach Competitive Grants Program CFDA 10.328

Funding Opportunity Summary (For more information, download from the Related Documents tab of this opportunity the Request for Applications (RFA) titled "Request for Applications_USDA-NRCS-NHQ-REJ-21-NOFO0001121")

The Office of Outreach and Partnerships Division (OPD) within the U.S. Department of Agriculture's Natural Resources Conservation Service (NRCS) provides leadership and funding to ensure that all programs and services are made accessible to all NRCS customers, fairly and equitably, with emphasis on reaching the underserved and socially disadvantaged farmers or ranchers and landowners. In this Request for Applications (RFA), NRCS requests applications for four OPD priority areas through the Racial Equity and Justice Conservation Cooperative Agreements. The goal of this outreach is for NRCS in collaboration with partners to expand the delivery of conservation assistance to historically underserved farmers and ranchers, including socially disadvantaged, limited resource, beginning, tribal and veteran. Proposals should support activities that introduce the concepts of climate-smart agriculture and to assist producers with planning and implementation of conservation practices and principles.

In accordance with 2 CFR §415.1(d), this is a non-competitive RFA restricted to eligible entities listed in section C.1. NRCS has determined that noncompetitive awards under this RFA are in the best interest of the Government and necessary to the accomplishment of the goals of the program to provide outreach and technical assistance to historically underserved communities. The anticipated amount for cooperative agreements under this solicitation is approximately \$50 million in fiscal year (FY) 2022.

Key Dates

This RFA solicits applications for eligible entities to enter into cooperative agreements with NRCS. Applications must be received by 11:59p.m. Eastern Time on October 25, 2021. Applications received after this deadline will not be considered for funding.

Webinar

A webinar for potential applicants will be scheduled for late September. When available, instructions regarding how to access the webinar will be posted in the opportunity on Grants.gov in the Synopsis tab and added to this RFA.

Application Package

NRCS expects applicants to read the entire RFA prior to submitting their application to ensure that they understand the program's requirements. This application checklist provides the required and conditionally required documents for an application package. Conservation Outreach: Racial Equity and Justice Conservation Cooperative Agreements requires that all application packages include the following, which can be found in the Related Documents tab of the opportunity in Grants.gov:

☐ Project Proposal Template

o Ensure the required format and does not exceed the page limit.

o Ensure project excludes unallowable costs and activities per Section D, Part 6, Funding Restrictions.

☐ SF 424 – Application for Federal Assistance

☐ SF 424A — Budget Information - Non-Construction Programs.

☐ Grants.gov Lobbying Form, Certification and Disclosure of Lobbying

If applicable, packages may also be required to include the following documents:

☐ Negotiated Indirect Cost Rate Agreement (NICRA) or De Minimis Indirect Cost Rate

Agreement

Federal Financial Assistance Training

The funding available through this NFO is Federal financial assistance. Grants 101 Training is highly recommended for those seeking knowledge about Federal financial assistance. The training is free and available to the public via https://www.cfo.gov/grants-training/. It consists of

five modules covering each of the following topics: 1) laws, regulations, and guidance; 2) financial assistance mechanisms; 3) uniform guidance administrative requirements; 4) cost principles; and 5) risk management and single audit. FPAC agencies also apply Federal financial assistance regulations to certain non-assistance awards (e.g., non-assistance cooperative agreements).

Deadline: October 25, 2021

REAP Energy Audit and Renewable Energy Development Assistance Program CFDA 10.868

This program assists rural small businesses and agricultural producers by conducting and promoting energy audits and providing Renewable Energy Development Assistance (REDA).

Who may apply for this program?

State and local governments.

Federally-recognized tribes.

A land-grant college or university or other institutions of higher education.

Rural electric cooperatives.

Public power entities.

An instrumentality of a state, tribal or local government.

A Resource Conservation & Development Council (as defined in 16 USC §3451).

How may funds be used?

The assistance must be provided to agricultural producers and rural small businesses. Rural small businesses must be located in eligible rural areas. This restriction does not apply to agricultural producers. Assistance provided must consist of:

Energy audits.

Renewable energy technical assistance.

Renewable energy site assessments.

Eligible project costs may include:

Salaries directly related to the project.

Travel expenses directly related to conducting energy audits or renewable energy development assistance. Office supplies.

Administrative expenses, up to a maximum of 5 percent of the grant, which include but are not limited to utilities, office space, operation expenses of office and other project-related equipment.

Funds may NOT be used for:

Payment for construction-related activities.

Purchase or lease of equipment.

Payment of judgments or debt owed the government.

Goods or services provided by a person or entity who has a conflict of interest.

Costs incurred by preparing an application package.

Funding political or lobbying activities.

What are the grant terms?

Applicants must submit separate applications, limited to one energy audit and one Renewable Energy Development Assistance (REDA) per fiscal year. The maximum aggregate amount of an energy audit and REDA grant in a Federal fiscal year is \$100,000.

Deadline: February 21, 2022

Rural Microentrepreneur Assistance Program (RMAP) CFDA 10.870

The purpose of RMAP is to support the development and ongoing success of rural Microentrepreneurs and Microenterprises, each as defined in 7 CFR 4280.302. The regulation can be accessed online at https://www.ecfr.gov. To accomplish this purpose, RMAP provides direct loans and grants to Microenterprise Development Organizations (MDO). Grant funds are used by the MDO to provide technical assistance and entrepreneurship training to rural individuals and businesses.

Deadline: June 30, 2022

U.S. Department of Commerce

FY 2021 American Rescue Plan Act Good Jobs Challenge CFDA 11.307

Through this American Rescue Plan Act Good Jobs Challenge Notice of Funding Opportunity (ARPA Good Jobs Challenge NOFO), EDA aims to assist communities and regions impacted by the coronavirus pandemic. The pandemic has caused, and continues to cause, economic injury to U.S. communities and regions in devastating and unprecedented ways.

This ARPA Good Jobs Challenge NOFO is designed to help get Americans back to work by developing and strengthening regional systems to develop and execute sectoral partnerships that will lead to well-paying jobs. The goal of regional workforce training systems is to create and implement effective employer-driven training programs that will connect the existing and emerging skills needs of employers with workers and will help workers find and keep quality jobs and advance along their chosen career path. Regional workforce training systems and sectoral partnerships funded under this NOFO should connect employers in an industry with key regional stakeholders, including state and local governmental entities, economic development organizations, workforce development boards, employer-facing organizations, education and training providers, community-based organizations (CBOs), worker-serving organizations (WSOs), and/or labor unions. The system or partnership should be led by a System Lead Entity or Backbone Organization, respectively, serving as an intermediary that has convening power in the region and the capacity to coordinate all necessary stakeholders. EDA also encourages systems and partnerships to address populations with labor market barriers such as persons with disabilities, at-risk youth, individuals in

recovery, individuals with past criminal records including justice-impacted and reentry participants, and veterans.

EDA anticipates making approximately 25 to 50 awards under this ARPA Jobs Training NOFO and scaling awards as appropriate to the proposed geographic, industry, and worker role coverage of a given regional system.

Deadline: January 26, 2022

FY 2021 American Rescue Plan Act Indigenous Communities Notice of Funding Opportunity CFDA 11.307

Through this Indigenous Communities NOFO, EDA aims to assist indigenous communities to recover economically from the coronavirus pandemic. Even before the pandemic, indigenous communities faced high levels of economic distress and unique economic development challenges, resulting in severe inequalities in opportunity for members of these communities. The pandemic greatly exacerbated those challenges and inequities and will continue to cause deep economic injury to indigenous communities in unprecedented ways.

EDA's American Rescue Plan Indigenous Communities NOFO is designed to support indigenous communities as they respond to, and recover from, the economic impacts of the coronavirus pandemic, including long-term recovery and resilience to future economic disasters. Under this announcement, EDA solicits applications under the authority of its Economic Adjustment Assistance (EAA) program, which is intended to be flexible and responsive to the economic development needs and priorities of indigenous communities.

Competitive applications for funding under this NOFO will propose projects designed to create the conditions for economic growth in indigenous communities and to accelerate economic recovery from the pandemic. These projects can include foundational economic infrastructure projects, such as such as broadband, energy, road, water, and wastewater infrastructure (including community water facilities); vocational and higher education facilities; and community health facilities that are necessary for future job creation. Projects can also include non-construction projects to provide technical assistance to support business development, entrepreneurship assistance, economic development planning, rural prosperity, and workforce training in indigenous communities. Further, EDA seeks to fund projects representing diverse geographies, from rural and urban settings to projects on or near tribal lands.

EDA plans on funding construction and non-construction projects that cost between approximately \$500,000 and \$5,000,000 under this NOFO.

Deadline: September 30, 2022

U.S. Department of Defense

DoD Traumatic Brain Injury and Psychological Health, Investigator-Initiated Research Award CFDA 12.420

The FY21 TBIPHRP IIRA is intended to support studies that will make an important contribution toward understanding, preventing, and treating TBI and/or psychological health conditions. Research projects may focus on any phase of research from basic laboratory research through translational research, including preclinical studies in animal models and human subjects, as well as correlative studies associated with an existing clinical trial. Research involving human subjects and human anatomical substances is permitted; however, this FY21 TBIPHRP IIRA may not be used to conduct clinical trials.

The IIRA is designed to support research with the potential to yield highly impactful discoveries or major advancements. The application should clearly demonstrate the project's potential near-term and long-term outcome(s)/product(s) (knowledge and/or materiel) and how they will impact a critical problem or question in the field of research and/or patient care in the FY21 TBIPHRP IIRA Focus Areas(s) addressed.

A clinical trial is defined as a research study in which one or more human subjects are prospectively assigned to one or more interventions (which may include placebo or other control) to evaluate the effects of the interventions on biomedical or behavioral health-related outcomes. This award may not be used to conduct clinical trials.

Applications proposing clinical trials may be submitted to the following FY21 TBIPHRP funding opportunities:

☐ Clinical Trial Award (Funding Opportunity Number: W81XWH-21-S-TBIPH1)
☐ Focused Program Award (Funding Opportunity Number: W81XWH-21-S-TBIPH2)
☐ Translational Research Award (Funding Opportunity Number: W81XWH-21-TBIPHRP-TRA)

Clinical research is defined as: (1) patient-oriented research. Research conducted with human subjects (or on material of human origin such as tissues, specimens, and cognitive phenomena) for which an investigator (or colleague) directly interacts with human subjects. Excluded from this definition are in vitro studies that utilize human tissues that cannot be linked to a living individual. Patient-oriented research includes: (a) mechanisms of human disease, (b) therapeutic interventions, (c) clinical trials, and (d) development of new technologies; (2) epidemiologic and behavioral studies; and (3) outcomes research and health services research. Note: Studies that meet the requirements for Institutional Review Board (IRB) Exemption 4 are not considered CDMRP-defined clinical research. IRB Exemption 4 refers to research involving the collection or study of existing de-identified specimens or data, if these sources are publicly available.

The FY21 TBIPHRP IIRA may not be used to support studies requiring an exception from informed consent.

For more information on how to distinguish clinical research from clinical trials, see the Human Subject Resource Document at https://ebrap.org/eBRAP/public/Program.htm.

Preliminary data are required. The rationale for a research idea may be derived from a laboratory discovery, population-based studies, a clinician's firsthand knowledge of patients, or anecdotal data. Applications must include relevant data that support the rationale for the proposed study. These data may be unpublished or from published literature. Any unpublished, preliminary data provided should originate from the laboratory of the Principal Investigator (PI) or members of the research team.

Relevance to Military Health: Relevance to the healthcare needs of Service Members, Veterans, military beneficiaries, and the American public is a key feature of this award. Investigators are encouraged to consider the following characteristics as examples of how a project may demonstrate relevance to military health:

Explanation of how the project addresses an aspect of TBI and/or psychological health that has direct relevance to the health and/or readiness of Service Members, Veterans, military beneficiaries, and the American public
Description of how the knowledge, information, products, or technologies gained from the proposed research could be implemented in a dual-use capacity to benefit the civilian population and also address a military need
Use of military or Veteran populations, samples, or datasets in the proposed research, if appropriate
☐ Collaboration with DOD or Department of Veterans Affairs (VA) investigators or consultants

Applicants are encouraged to integrate and/or align their research projects with DOD and/or VA research laboratories and programs. Collaborations between researchers at military or Veterans institutions and non-military institutions are strongly encouraged. These relationships can leverage knowledge, infrastructure,

and access to unique data and research resources that the partners bring to the research effort, ultimately advancing TBI and psychological health research of significance to Service Members, Veterans, military beneficiaries, and the American public. A list of websites that may be useful in identifying additional information about ongoing DOD and VA areas of research interest or potential opportunities for collaboration can be found in Appendix 2.

Early-Career Investigator Partnering Option: The FY21 TBIPHRP encourages applications that include meaningful and productive collaborations between investigators. The FY21 TBIPHRP IIRA includes a partnering option with a PI who is an Early-Career Investigator. The PIs may have experience in similar or disparate scientific disciplines, but each PI is expected to bring distinct contributions to the application. The Partnering PI Option is structured to accommodate two PIs. One PI will be identified as the Initiating PI and will be responsible for the majority of the administrative tasks associated with application submission. The other investigator will be the Partnering PI. Either the Initiating or Partnering PI may be the Early-Career Investigator. Both PIs should contribute significantly to the development of the proposed research project, including the Project Narrative, Statement of Work (SOW), and other required components. The application is expected to describe how the PIs' unique experience/ expertise combined as a partnership will better address the research question, how the unique experience/expertise that each individual brings to the application is critical for the research strategy and completion of the SOW, and why the work should be done together rather than through separate efforts. If recommended for funding, each PI will be named to an individual award within the recipient organizations. For individual submission requirements for the Initiating and Partnering PI, refer to Section II.D.2, Content and Form of the Application Submission.

The types of awards made under the program announcement will be assistance agreements. An assistance agreement is appropriate when the federal government transfers a "thing of value" to a "state, local government," or "other recipient" to carry out a public purpose of support or stimulation authorized by a law of the United States instead of acquiring property or service for the direct benefit and use of the U.S. government. An assistance agreement can take the form of a grant or cooperative agreement. The level of involvement on the part of the DOD during project performance is the key factor in determining whether to award a grant or cooperative agreement. If "no substantial involvement" on the part of the funding agency is anticipated, a grant award will be made (31 USC 6304). Conversely, if substantial involvement on the part of the funding agency is anticipated, a cooperative agreement will be made (31 USC 6305), and the award will identify the specific substantial involvement. Substantial involvement may include, but is not limited to, collaboration, participation, or intervention in the research to be performed under the award. The award type, along with the start date, will be determined during the negotiation process.

The anticipated total costs budgeted for the entire period of performance for an FY21 TBIPHRP IIRA will not exceed \$750,000. Refer to Section II.D.5, Funding Restrictions, for detailed funding information.

Awards will be made no later than September 30, 2022. For additional information refer to Section II.F.1, Federal Award Notices.

The CDMRP expects to allot approximately \$11.25M to fund approximately 15 FY21 TBIPHRP Investigator-Initiated Research Award applications. Funding of applications received is contingent upon the availability of federal funds for this program as well as the number of applications received, the quality and merit of the applications as evaluated by scientific and programmatic review, and the requirements of the government. Funds to be obligated on any award resulting from this funding opportunity will be

available for use for a limited time period based on the fiscal year of the funds. It is anticipated that awards made from this FY21 funding opportunity will be funded with FY21 funds, which will expire for use on September 30, 2027.

Deadline: September 30, 2021

FY22 Young Investigator Program CFDA 12.300

The Office of Naval Research (ONR) is interested in receiving proposals for its Young Investigator Program (YIP). ONR's Young Investigator Program seeks to identify and support academic scientists and engineers who are in their first or second full-time tenure-track or tenure-track-equivalent academic appointment, who have received their PhD or equivalent degree on or after 01 January 2014, and who show exceptional promise for doing creative research. The objectives of this program are to attract outstanding faculty members of Institutions of Higher Education (hereafter also called "universities") to the Department of the Navy's Science and Technology (S&T) research program, to support their research, and to encourage their teaching and research careers. Individuals who are holding U.S. non-profit equivalent positions are also encouraged to apply.

Proposals addressing research areas (as described in the ONR Science and Technology Department section of ONR's website at www.onr.navy.mil) which are of interest to ONR Program Officers will be considered. Contact information for each division (a subgroup of an S&T Department) is also listed within the S&T section of the website.

Applicants are STRONGLY ENCOURAGED to contact the appropriate Program Officer who is the point of contact for a specific technical area to discuss their research ideas before submitting a proposal. A list of most Program Officers and their contact information can be found at:

https://www.onr.navy.mil/our-research/technology-areas or at:

https://www.onr.navy.mil/our-research/our-program-managers.

Please see full text of FOA for more details.

Deadline: October 29, 2021

Reimagining Protein Manufacturing (RPM) CFDA 12.910

The Reimagining Protein Manufacturing (RPM) program aims to ensure timely DoD access to critical medical countermeasures (MCMs) by establishing the foundational technologies needed for fully distributed, on-demand manufacturing of protein-based MCMs and associated raw materials. To achieve this goal, RPM will develop technologies to enable immediate synthesis (lead time approximately 24 hours) of bioactive protein MCMs and raw material production enzymes at a yield corresponding to > 500 doses

per week. This technology will allow the DoD to rapidly secure access to both therapeutic proteins and enzymes needed for nucleic acid-based MCM synthesis, and reduce reliance on complex supply chains.

Deadline: November 16, 2021

FY2022 Department of the Navy (DoN) Historically Black Colleges and Universities/Minority Institutions (HBCU/MI) Program CFDA 12.300

The Department of Navy (DoN) Historically Black Colleges and Universities/Minority Institutions (HBCU/MI) Program aims to increase the quantity and quality of minority professionals in science, technology, engineering, and mathematics (STEM) in the defense community. Research conducted at Minority-Serving Institutions (MSIs) for the DoN HBCU/MI Program:

- Enhances the research and educational capabilities of HBCU/MIs in scientific and engineering disciplines critical to the defense mission of the U.S. Navy and U.S. Marine Corps
- Encourages cross-institutional, collaborative efforts that explore innovative solutions to naval science and technology (S&T) challenges, and
- Increases the engagement of students, including underrepresented minorities, in STEM fields important to the U.S. Navy and U.S. Marine Corps.

This FOA is executed under policy and guidance of the DoN HBCU/MI Program and is administered by the Office of Naval Research (ONR). Competitive white papers and full invited proposals submitted to this FOA must clearly and succinctly describe efforts that advance basic naval-relevant S&T, engage faculty and students in STEM discovery, and expand the research capacity of participant institutions.

Deadline: December 01, 2021

U.S. Department of Education

Office of Postsecondary Education (OPE): Higher Education Program (HEP): Transitioning Gang-Involved Youth to Higher Education Program, CFDA 84.116Y

Note: Each funding opportunity description is a synopsis of information in the Federal Register application notice. For specific information about eligibility, please see the official application notice. The official version of this document is the document published in the Federal Register. Free Internet access to the official edition of the Federal Register and the Code of Federal Regulations is available on GPO Access at: http://www.access.gpo.gov/nara/index.html. Please review the official application notice for pre-

application and application requirements, application submission information, performance measures, priorities and program contact information

For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the Federal Register on February 13, 2019 (84 FR 3768), or at www.govinfo.gov/content/pkg/FR-2019-02-13/pdf/2019-02206.pdf

Purpose of Program: The purpose of this program is to provide gang-involved youth with postsecondary education opportunities that will lead to certification or credentials. Such programs can include apprenticeships or other workforce preparation programs that promote job readiness upon completion of the program, while simultaneously providing essential wrap-around services that include culturally competent social and emotional support.

Deadline: November 29, 2021

Office of Elementary & Secondary Education; Overview Information: Race to the Top Fund (ARRA) CFDA 84.395

The Race to the Top is a \$4.35 billion competitive grant program designed to encourage and reward States that are creating the conditions for education innovation and reform and implementing ambitious plans in four core education reform areas: Adopting internationally-benchmarked standards and assessments that prepare students for success in college and the workplace; Recruiting, developing, retaining, and rewarding effective teachers and principals; Building data systems that measure student success and inform teachers and principals how they can improve their practices; and Turning around lowest-performing schools The overarching goals are to: Drive substantial gains in student achievement Improve high school graduation rates and prepare students for success in college and careers Close achievement gaps The Department plans to make Race to the Top grants in two phases. States that are ready to apply may do so in Phase 1, which will open in late 2009. States that need more time may apply in Phase 2, which will open in spring 2010. States that apply in Phase 1 but are not awarded grants may reapply for funding in Phase 2, together with States that are applying for the first time in Phase 2. Phase 1 grantees may not apply for additional funding in Phase 2. We will announce specific deadlines for both Phase 1 and Phase 2 in subsequent notice(s) inviting applications for funds under this program.

Deadline: Rolling

Office of Elementary and Secondary Education (OESE): Project to Support America's Families and Educators (Project SAFE) Grant Program Assistance Listing Number (ALN) 84.184N

Note: Each funding opportunity description is a synopsis of information in the Federal Register application notice. For specific information about eligibility, please see the official application notice. The official version of this document is the document published in the Federal Register. Free Internet access to the official edition of the Federal Register and the Code of Federal Regulations is available on GPO Access at: http://www.access.gpo.gov/nara/index.html. Please review the official application notice for preapplication and application requirements, application submission information, performance measures, priorities and program contact information.

For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the Federal Register on February 13, 2019 (84 FR 3768), or at www.govinfo.gov/content/pkg/FR-2019-02-13/pdf/2019-02206.pdf

The Project SAFE grant program is intended to improve students' safety and well-being by providing resources to local educational agencies (LEAs) that adopt and implement strategies to prevent the spread of the Novel Coronavirus Disease 2019 (COVID-19) consistent with guidance from the Centers for Disease Control and Prevention (CDC) and that are financially penalized for doing so by their State educational agency (SEA) or other State entity.

Purpose of Program: The Project SAFE grant program provides grants to eligible LEAs to improve student safety and well-being by advancing strategies consistent with CDC guidance to reduce transmission of COVID-19 in schools.

To submit an application, please email the completed and signed application, along with required attachments, to ProjectSAFE@ed.gov.

Deadline: Rolling

U.S. Department of Energy

U.S. Department of Health and Human Services

Non-Viral Technologies for in vivo Delivery of Genome Editors (R43/R44 Clinical Trial Not Allowed)-(CFDA 93.350)

The purpose of this PAR is to support the development and evaluation of non-viral technologies to deliver genome editors to disease-relevant somatic cells and tissues in vivo. The ultimate goal of these technologies is a translation into clinical trials of genome editing to treat human disease.

Deadline: January 05, 2022

Postbaccalaureate Research Education Program (R25 - Independent Clinical Trial Not Allowed) CFDA-93.859

This funding opportunity announcement (FOA) provides support to eligible, domestic institutions to develop and implement effective, evidence-informed approaches to biomedical research education and mentoring that will keep pace with the rapid evolution of the research enterprise. NIGMS expects that the proposed research education programs will incorporate extensive research experiences, well-designed courses for skills development, mentoring, cohort building activities, and career development elements to prepare recent baccalaureates from diverse backgrounds to transition into and complete rigorous research-focused doctoral degree programs (e.g., Ph.D. or M.D./Ph.D.) in biomedical fields. This program is limited to applications from doctoral degree-granting research-intensive institutions. This Funding Opportunity

Announcement (FOA) does not allow appointed participants to lead an independent clinical trial but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.

Deadline: January 27, 2022

Novel Synthetic Nucleic Acid Technology Development (R21 Clinical Trial not allowed)-(CFDA 93.172)

This Funding Opportunity Announcement (FOA) solicits R21 grant applications to develop novel technologies that will enable substantive (no less than one order of magnitude) improvement in synthetic nucleic acids. The goal is to improve the quality, capabilities, and efficiency of nucleic acid synthesis and synthetic constructs at reasonable and decreased costs. Applicants may propose to develop novel complete synthesis and/or synthetic constructs systems, investigate challenges underlying key novel system components, or propose substantive improvements of at least an order of magnitude improvement to existing systems. Exploration of methods other than those currently in use is highly encouraged. High-risk/high-payoff applications are appropriate to achieve the goals of this FOA.

Deadline: June 24, 2022

Interactive Digital Media STEM Resources for Pre-College and Informal Science Education Audiences (SBIR) (R43/R44 Clinical Trial Not Allowed) CFDA 93.859

The purpose of this Funding Opportunity Announcement (FOA) is to provide opportunities for eligible small business concerns (SBCs) to submit NIH Small Business Innovation Research (SBIR) grant applications to develop interactive digital media science, technology, engineering and mathematics (STEM) resources that address student career choice and health and medicine topics for: (1) pre-kindergarten to grade 12 (P-12) students, and pre- and in-service teachers and famlies ("Teachers") or (2) Informal science education (ISE), i.e., outside the classroom resources for the general public. Interactive digital media (IDM) are defined as products and services on digital computer-based systems which respond to the user's actions by presenting content such as text, moving image, animation, video, audio, and video games. There is a large body of evidence that IDM technology has the potential to support learning in a variety of contexts from primary and secondary schools, to universities, adult education and workplace training. IDM is widely used to train, educate, and encourage behavioral changes in a virtual world format where progressive learning, feedback on success and user control are combined into an interactive and engaging experience. It is anticipated that this SBIR FOA will facilitate the translation of new or existing health and medicinebased, P-12 STEM curricula and museum exhibits into educational Interactive Digital Media STEM (IDM STEM) resources that will provide a hands-on, inquiry-based and learning-by-doing experience for students, teachers and the community.

Deadline: September 02, 2022

Palliative Care in Home and Community Settings (R01 Clinical Trial Optional) – (CFDA 93.361)

The purpose of this funding opportunity is to stimulate research aimed at determining needs and best practices for the integration of palliative care into home and community settings. Home and community in this FOA refer to the place where an individual resides or lives. Home- and community-based palliative care programs ensure those with serious, advanced illness who do not require hospitalization but are not appropriate for hospice have access to high-quality end-of-life and palliative care.

Deadline: September 7, 2022

Core Infrastructure Support for Cancer Epidemiology Cohorts (U01 Clinical Trial Not Allowed) CFDA 93.393

Through this Funding Opportunity Announcement (FOA), the National Cancer Institute (NCI) encourages grant applications for support of the core functions of Cancer Epidemiology Cohorts (CECs), as well as methodological research. This FOA is intended to support maintenance of existing CECs infrastructure and resource sharing with broader scientific communities.

Deadline: November 09, 2022

NCI Research Specialist (Laboratory-based Scientist) Award (R50 Clinical Trial Not Allowed) CFDA 93.393

This Funding Opportunity Announcement (FOA) invites grant applications for the Research Specialist Award (R50) in any area of NCI-funded cancer research. This FOA is specifically for laboratory-based scientists. The Research Specialist Award is designed to encourage the development of stable research career opportunities for exceptional scientists who want to continue to pursue research within the context of an existing NCI-funded basic, translational, clinical, or population science cancer research program, but not serve as independent investigators. These non-tenure track scientists, such as researchers within a research program, are vital to sustaining the biomedical research enterprise. It is anticipated that only exceptional scientists who want to pursue research within the context of an existing NCI-funded cancer research program, but not serve as independent investigators, will be competitive for this award.

Deadline: November 01, 2021

Ryan White HIV/AIDS Program HIV Care Grant Program – Part B States/Territories Formula and AIDS Drug Assistance Program Formula and ADAP Supplemental Awards CFDA 93.917

This notice announces the opportunity to apply for funding under the Ryan White HIV/AIDS Program (RWHAP) Part B Base, AIDS Drug Assistance Program (ADAP) Base, ADAP Supplemental, Minority AIDS Initiative (MAI), and Emerging Communities (EC) program. The purpose of this program is to assist states and territories in developing and/or enhancing access to a comprehensive continuum of high quality HIV care and treatment for low-income people with HIV. For the purposes of this program, "states/territories" include the 50 states, the District of Columbia, the Commonwealth of Puerto Rico, the Northern Mariana Islands, American Samoa, Guam, the U.S. Virgin Islands, the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau.

Deadline: November 08, 2021

Advancing Validated Drug Targets for Substance Use Disorders (R41/R42 - Clinical Trial Not Allowed) CFDA 93.279

This Funding Opportunity Announcement (FOA) solicits grant applications from small business concerns (SBCs) to continue research projects with robustly validated targets for Substance Use Disorders (SUDs). This FOA will provide funding for projects entering at either assay development (AD), lead identification (LI), lead optimization (LO), or preclinical development (PCD) stages to allow for the ultimate goal of successfully completing Investigational New Drug-enabling activities.

Deadline: February 18, 2022

Advancing Validated Drug Targets for Substance Use Disorders (R43/R44 - Clinical Trial Not Allowed) CFDA 93.279

This Funding Opportunity Announcement (FOA) solicits grant applications from small business concerns (SBCs) to continue research projects with robustly validated targets for Substance Use Disorders (SUDs). This FOA will provide funding for projects entering at either assay development (AD), lead identification (LI), lead optimization (LO), or preclinical development (PCD) stages to allow for the ultimate goal of successfully completing Investigational New Drug-enabling activities.

Deadline: February 18, 2022

New Investigators to Promote Workforce Diversity in Genomics, Bioinformatics, or Bioengineering and Biomedical Imaging Research (R01 Clinical Trial Optional) CFDA 93.837

This Funding Opportunity Announcement (FOA) solicits R01 grant applications that propose independent research projects that are within the scientific mission areas of the National Human Genome Research Institute (NHGRI), National Institute of Biomedical Imaging and Bioengineering (NIBIB), and All of Us Research Program (All of Us). This program is intended to support Early Stage Investigators and New Investigators (https://grants.nih.gov/policy/early-investigators/index.htm) from diverse backgrounds, including those from groups underrepresented in the health-related sciences.

Deadline: February 22, 2021

Pilot and Feasibility Studies to Improve Technology Adoption and Reduce Health Disparities in Type 1 Diabetes Mellitus (R01 Clinical Trial Required) CFDA 93.847

The purpose of this Funding Opportunity Announcement (FOA) is to support pilot and feasibility trials of interventions designed to improve technology adoption in individuals from underrepresented backgrounds with type 1 diabetes mellitus (T1D). Through successful execution, these pilot and feasibility trials should provide feasibility data for larger, pragmatic trials with the overarching goal of reducing health disparity in T1D through improving technology usage in individuals from minority racial and ethnic backgrounds.

Deadline: March 03, 2022

<u>Limited Competition Emergency Awards: Shared Personal Protective Equipment Resources for COVID-19 Related Vaccine and Treatment Clinical Trials and Clinical Studies (S10 Clinical Trial Not Allowed) CFDA 93.855</u>

The purpose of this public health emergency funding opportunity is to provide Personal Protective Equipment (PPE) to directly support the needs of the NIAIDs vaccine and treatment clinical trials and clinical studies for COVID-19. This program will ensure that adequate protective equipment is available to directly assist in safely carrying out the clinical activities and direct interactions with the patients participating in the trial. Eligibility is limited to recipients conducting COVID-related clinical research and clinical studies supported by NIAIDs emergency appropriation provided by The Coronavirus Preparedness and Response Supplemental Appropriations Act, 2020 ,and The Coronavirus Aid, Relief and Economic Security (CARES) Act, The Coronavirus Response and Relief Supplemental Appropriations Act, 2021 and The American Rescue Plan Act of 2021.

Deadline: July 15, 2022

Genome Research Experiences to Attract Talented Undergraduates into the Genomics Field to Enhance Diversity (R25 Clinical Trial Not Allowed) CFDA 93.172

The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this NHGRI R25 program is to support educational activities that encourage undergraduates from diverse backgrounds, including those from groups underrepresented in the biomedical workforce, to pursue further training and careers in the scientific, medical, ethical, social and/or legal areas of genomics research. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on: Research Experiences Courses for Skills Development Mentoring Activities This Genome Research Experiences to Attract Talented Undergraduates into the Genomic Field to Promote Diversity (GREAT) Program will support collaborative institutional partnerships that provide two-year research education programs for undergraduates enrolled at minority-serving institutions (MSIs) or Institutional Development Award (IDeA)-eligible institutions. A partnership will include a MSI or IDeA-eligible institution, and one or more research-intensive institutions or organizations with a suitable research base for graduate-level training in scientific areas of interest to NHGRI.

Deadline: July 01, 2023

NINDS Research Education Opportunities (R25 Clinical Trial Not Allowed) CFDA 93.853

The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The over-arching goal of this NINDS R25 program is to support educational activities that complement and/or enhance the training of a workforce to meet the nations biomedical, behavioral and clinical research needs.

Deadline: July 13, 2023

BRAIN Initiative: Research on the Ethical Implications of Advancements in Neurotechnology and Brain Science (R01 Clinical Trial Optional) CFDA 93.173

Reissue of RFA-MH-19-400. This funding opportunity announcement (FOA), in support of the NIH Brain Research through Advancing Innovative Neurotechnologies (BRAIN) Initiative, is one of several FOAs aimed at supporting transformative discoveries that will lead to breakthroughs in understanding human brain function. Guided by the long-term scientific plan, BRAIN 2025: A Scientific Vision, this FOA specifically seeks to support efforts addressing core ethical issues associated with research focused on the human brain and resulting from emerging technologies and advancements supported by the BRAIN

Initiative. The hope is that efforts supported under this FOA might be both complementary and integrative with the transformative, breakthrough neuroscience discoveries supported through the BRAIN Initiative.

Deadline: October 11, 2023

Co-infection and Cancer (R01 Clinical Trial Not Allowed)-CFDA 93.393

This initiative seeks to enhance our mechanistic and epidemiologic understanding of infection-related cancers, with a focus on the etiologic roles of co-infection in cancer. Preference will be given to investigations of co-infections with known oncogenic agents (e.g., Helicobacter pylori [H. pylori] and Epstein Barr virus [EBV]; excluding human immunodeficiency virus [HIV]) and of co-infections that engendered novel opportunities for prevention and treatment. Coinfection is defined as the occurrence of infections by two or more infectious (pathogenic or nonpathogenic) agents either concurrently or sequentially and includes both acute and chronic infections by viruses, bacteria, parasites, and/or other microorganisms.

Deadline: January 07, 2023

EHR Core Research (ECR): Building Capacity in STEM Education Research-CFDA 93.855

This Funding Opportunity Announcement (FOA), issued by the National Institute of Allergy and Infectious Diseases (NIAID), invites applications for investigator-initiated Resource-Related Research Projects (R24). The proposed resource must provide a significant benefit to currently funded high priority projects in need of further coordination and support in the areas specified. Under rare circumstances, this mechanism may be used to support the development of a new resource to the broader scientific community of the NIAID. It is anticipated that the request for resource support through the R24 activity code will occur on an infrequent basis and only in circumstances where other mechanisms of support from the NIAID are not appropriate. The proposed resources should be relevant to the scientific areas of the NIAID mission including the biology, pathogenesis, and host response to microbes, including HIV; the mechanisms of normal immune function and immune dysfunction resulting in autoimmunity, immunodeficiency, allergy, asthma, and transplant rejection; and translational research to develop vaccines, therapeutics, and diagnostics to prevent and treat infectious, immune-mediated, and allergic diseases.

Deadline: January 07, 2023

Archiving and Documenting Child Health and Human Development Data Sets (R03 Clinical Trial Not Allowed)-CFDA 93.865

The purpose of this funding opportunity announcement (FOA) is to invite R03 applications to support archiving and documenting existing data sets to enable secondary analysis of these data by the scientific community. The priority of this program is to archive data sets within the scientific mission of the NICHD; the highest priority is to archive data collected with NICHD support.

Deadline: January 07, 2023

NIDCR Predoctoral to Postdoctoral Transition Award for A Diverse Dental, Oral, and Craniofacial Research Workforce (F99/K00 Clinical Trial Not Allowed)-CFDA 93.121

The purpose of this award is to support phased transition of outstanding graduate students from groups underrepresented in the biomedical, clinical, behavioral and social sciences research enterprise from graduate work to postdoctoral research positions in Dental, Oral, and Craniofacial (DOC) research. The first phase (F99) will support the final two years of graduate research training for individuals in Ph.D. or dual degree clinician-scientist programs. Following graduation and attainment of a postdoctoral research position, the second phase (K00) will provide support for up to three years of mentored postdoctoral research.

Deadline: January 07, 2023

Integration of Imaging and Fluid-Based Tumor Monitoring in Cancer Therapy (R01 Clinical Trial Optional) CFDA 93.393

Through this funding opportunity announcement (FOA), the National Cancer Institute (NCI) seeks research project (R01) grant applications describing projects that integrate imaging and fluid-based tumor monitoring (liquid biopsy) assays during cancer therapy in patients to determine the optimal use of those modalities in the characterization of therapy response and/or emergence of resistance.

Deadline: September 07, 2024

<u>Utilizing Invasive Recording and Stimulating Opportunities in Humans to Advance</u>
<u>Neural Circuitry Understanding of Mental Health Disorders (R01 Clinical Trial</u>
<u>Optional) CFDA 93.242</u>

Reissue of RFA-20-350. The purpose of this Funding Opportunity Announcement (FOA) is to encourage applications to pursue invasive neural recording studies focused on mental health-relevant questions. Invasive neural recordings provide an unparalleled window into the human brain to explore the neural circuitry and neural dynamics underlying complex moods, emotions, cognitive functions, and behaviors with high spatial and temporal resolution. Additionally, the ability to stimulate, via the same electrodes, allows for direct causal tests by modulating network dynamics. This funding opportunity aims to target a gap in the scientific knowledge of neural circuit function related to mental health disorders. Researchers should target specific questions suited to invasive recording modalities that have high translational potential. Development of new technologies and therapies are outside the scope of this FOA.

Deadline: September 07. 2024

Investigator Initiated Research in Computational Genomics and Data Science (R01 Clinical Trial Not Allowed) CFDA 93.172

The purpose of this funding opportunity announcement (FOA) is to invite applications for a broad range of research efforts in computational genomics, data science, statistics, and bioinformatics relevant to one or both of basic or clinical genomic science, and broadly applicable to human health and disease. This FOA supports fundamental genomics research developing innovative analytical methodologies and approaches, early-stage development of tools and software, and refinement or hardening of software and tools of high value to the biomedical genomics community. Work supported under this FOA should be enabling for genomics and be generalizable or broadly applicable across diseases and biological systems. All applications should address how the methods would scale to address increasingly larger data sets.

Deadline: September 07, 2024

Investigator Initiated Research in Computational Genomics and Data Science (R21 Clinical Trial Not Allowed) CFDA 93.173

The purpose of this funding opportunity announcement (FOA) is to invite applications for a broad range of research efforts in computational genomics, data science, statistics, and bioinformatics relevant to one or both of basic or clinical genomic science, and broadly applicable to human health and disease. This FOA supports fundamental genomics research developing innovative analytical methodologies and approaches, early-stage development of tools and software, and refinement or hardening of software and tools of high value to the biomedical genomics community. Work supported under this FOA should be enabling for genomics and be generalizable or broadly applicable across diseases and biological systems. All applications should address how the methods would scale to address increasingly larger data sets.

Deadline: September 07, 2024

Imaging - Science Track Award for Research Transition (I/START) (R03- Basic Experimental Studies with Humans Required) CFDA 93.279

This funding opportunity announcement (FOA) encourages Small Research Grant (R03) applications to facilitate the entry of investigators to the area of neuroimaging, including both new investigators and established investigators seeking to adopt neuroimaging methodologies in their research programs, to enable the conduct of small "proof of concept" studies. The R03 is intended to support research projects that can be carried out in a short period of time with limited resources.

Deadline: September 07, 2024

Initiation of a Mental Health Family Navigator Model to Promote Early Access, Engagement and Coordination of Needed Mental Health Services for Children and Adolescents (R01 Clinical Trial Required) CFDA 93.242

Reissue of PAR-18-428. The purpose of this Funding Opportunity Announcement (FOA) is to encourage research applications to develop and test the effectiveness and implementation of family navigator models designed to promote early access, engagement and coordination of mental health treatment and services for children and adolescents who are experiencing early symptoms of mental health problems. For the purposes of this FOA, NIMH defines a family navigator model as a health care professional or paraprofessional whose role is to deploy a set of strategies designed to rapidly engage youth and families in needed treatment and services, work closely with the family and other involved treatment and service providers to optimize care and monitor the trajectory of mental health symptoms and outcomes over time. Applicants are encouraged to develop and test the navigator models ability to promote early access, engagement and coordination of mental health treatment and services for children and adolescents as soon as symptoms are detected. Of interest are navigator models that coordinate needed care strategies, determine the personalized match to the level of needed service amount, frequency and intensity, and harness novel technologies to track and monitor the trajectory of clinical, functional and behavioral progress toward achieving intended services outcomes. This FOA is published in parallel to a companion R34.

Deadline: September 07, 2024

Effectiveness of School-Based Health Centers to Advance Health Equity (R01 Clinical Trial Optional) CFDA 93.242

The purpose of this Funding Opportunity Announcement is to support research that investigates the effectiveness of school-based health centers (SBHCs) as a health services care delivery model to address the needs of school-aged children from populations with health disparities (underserved youth).

Deadline: January 07, 2025

U.S. Department of Housing and Urban Development

Notice of Funding Opportunity (NOFO) for Fiscal Year (FY) 2021 Continuum of Care Competition and Noncompetitive Award of Youth Homeless Demonstration

Program Renewal and Replacement Grants CFDA 14.267

The CoC Program (24 CFR part 578) is designed to promote a community-wide commitment to the goal of ending homelessness; to provide funding for efforts by nonprofit organizations, state governments, local governments, instrumentalities of state and local governments, Indian Tribes, tribally designated housing entities, as defined in section 4 of the Native American Housing Assistance and Self-Determination Act of 1996 (25 U.S.C. 4103), and public housing agencies, as such term is defined in 24 CFR 5.100, are eligible without limitation or exclusion, to quickly re-house homeless individuals, families, persons fleeing domestic violence, and youth while minimizing the trauma and dislocation caused by homelessness; to promote access to and effective utilization of mainstream programs by homeless; and to optimize self-sufficiency among those experiencing homelessness.

Deadline: November 16, 2021

U.S. Department of Homeland Security

Fiscal Year 2021 Flood Mitigation Assistance (FMA) CFDA 97.029

The Flood Mitigation Assistance (FMA) program makes federal funds available to states, U.S. territories, federally recognized tribal governments, and local communities to reduce or eliminate the risk of repetitive flood damage to buildings and structures insured under the National Flood Insurance Program (NFIP). It does so with a recognition of the growing flood hazards associated with climate change1, and of the need for flood hazard risk mitigation activities that promote climate adaptation and resilience with respect to flooding. These include both acute extreme weather events and chronic stressors which have been observed and are expected to increase in the future.

Deadline: January 28, 2022

Fiscal Year 2021 Building Resilient Infrastructure and Communities (BRIC) CFDA 97.047

The Building Resilient Infrastructure and Communities (BRIC) program makes federal funds available to states, U.S territories, federally recognized tribal governments, and local communities for hazard mitigation activities. It does so with a recognition of the growing hazards associated with climate change1, and of the need for natural hazard risk mitigation activities that promote climate adaptation and resilience with respect to those hazards. These include both acute extreme weather events and chronic stressors which have been observed and are expected to increase in the future.

Deadline: January 28, 2022

U.S. Department of the Interior

FY 2022 Clean Vessel Act (CVA) CFDA 15.616

The Clean Vessel Act of 1992 was signed November 4, 1992 (106 Stat. 5039) and codified in 33 U.S.C. 1322. The Act amended the Dingell-Johnson Sport Fish Restoration Act (Wallop-Breaux Act; 16 U.S.C. 777) and established the Clean Vessel Act Grant Program (CVA) to provide funding to the 50 States, the District of Columbia, Commonwealths, and territories of the United States of America (States). Funding allows States to construct, renovate, operate, and maintain pumpout stations and waste reception facilities for recreational boaters and to inform boaters about the use, benefits, and availability of pumpout stations and waste reception facilities. Subsequent reauthorizations of the Acts have allowed for the continuation of the CVA.

Deadline: November 24, 2021

FY2021 Historic Preservation Fund- African American Civil Rights- History Grants CFDA 15.904

The National Park Service's (NPS) African American Civil Rights Grant Program (AACR) will document, interpret, and preserve the sites and stories related to the African American struggle to gain equal rights as citizens as well as the transatlantic slave trade. The NPS 2008 report, Civil Rights in America, A Framework for Identifying Significant Sites, will serve as a guide in determining the appropriateness of proposed projects and properties. AACR Preservation Grants are funded by the Historic Preservation Fund (HPF),

administered by the NPS, and will fund a broad range of history projects for historic sites including survey and inventory, National Register nominations, oral histories and more. Grants are awarded through a competitive process and do not require non-Federal match. There are separate funding announcements for physical preservation projects and for historical research/documentation projects. Funding announcement P21AS00431 is for physical preservation of historic sites only; P21AS00432 is for historical research/documentation/survey/nomination projects. Please ensure you apply under the correct opportunity number for your project. There is a new Historic Equal Rights grant program under P21AS00430 for physical preservation only of sites involved in the struggle for all Americans civil rights. FY2021 Public Law 116-260 provides \$16,750,000 million for the AACR Grant Program.

Deadline: December 1, 2021

FY2021 Historic Preservation Fund- African American Civil Rights- Preservation Grants CFDA 15.904

The National Park Service's (NPS) African American Civil Rights Grant Program (AACR) will document, interpret, and preserve the sites and stories of the full history of the African American struggle to gain equal rights as citizens. The NPS 2008 report, Civil Rights in America, A Framework for Identifying Significant Sites, will serve as a guide in determining the appropriateness of proposed projects and properties. AACR Preservation Grants are funded by the Historic Preservation Fund (HPF), administered by the NPS, and will fund a broad range of preservation projects for historic sites including architectural services, historic structure reports, preservation plans, and physical preservation to structures. Grants are awarded through a competitive process and do not require non-Federal match. There are separate funding announcements for physical preservation projects and for historical research/documentation projects. Funding announcement P21AS00431 is for physical preservation of historic sites only; P21AS00432 is for historical research/documentation/survey/nomination projects. Please ensure you apply under the correct opportunity number for your project. There is a new Historic Equal Rights grant program under P21AS00430 for physical preservation only of sites involved in the struggle for All American's civil rights. FY2021 Public Law 116-260 provides \$16.75 million for the AACR Grant Program.

Deadline: December 1, 2021

FY2021 Historic Preservation Fund- History of Equal Rights- Preservation Grants CFDA 15.904

The National Park Service's (NPS) History of Equal Rights Grant Program (HER) will preserve sites related to the struggle of all American's to achieve equal rights. HER grants are funded by the Historic Preservation

Fund (HPF), administered by the NPS, and will fund a broad range of preservation projects for historic sites including: architectural services, historic structure reports, preservation plans, and physical preservation to structures. Grants are awarded through a competitive process and do not require non-Federal match. The HER opportunity number is P21AS00430. There are separate funding announcements for African American Civil Rights physical preservation projects and for historical research/documentation projects. Funding announcement P21AS00431 is for physical preservation of African American historic sites only; P21AS00432 is for African American historical research/documentation projects only. Ensure you apply under the correct opportunity number for your project.

Deadline: December 1, 2021

FY2021 Historic Preservation Fund- Save America's Treasures Preservation Grants CFDA 15.929

Save America's Treasures grants from the Historic Preservation Fund provide preservation and/or conservation assistance to nationally significant historic properties and collections. Grants are awarded through a competitive process and require a dollar-for-dollar, non-Federal match, which can be cash or documented in-kind. The grant program is administered by the National Park Service (NPS) in partnership with the National Endowment for the Arts (NEA), the National Endowment for the Humanities (NEH), and the Institute of Museum and Library Services (IMLS). There are separate opportunities for preservation and collections projects. The preservation opportunity can be found under opportunity number P21AS00433. The collections opportunity can be found under opportunity Number P21AS00434.FY2021 Public Law 116-260 provides \$25 million for the SAT Grant Program.

Deadline: December 14, 2021

FY2021 Historic Preservation Fund- Save America's Treasures Collection Grants CFDA 15.929

Save America's Treasures grants from the Historic Preservation Fund provide preservation and/or conservation assistance to nationally significant historic properties and collections. Grants are awarded through a competitive process and require a dollar-for-dollar, non-Federal match, which can be cash or documented in-kind. The grant program is administered by the National Park Service (NPS) in partnership with the National Endowment for the Arts (NEA), the National Endowment for the Humanities (NEH), and the Institute of Museum and Library Services (IMLS). There are separate opportunities for preservation and

collections projects. The collections opportunity can be found under opportunity number P21AS00434. The preservation opportunity can be found under opportunity Number P21AS00433.FY2021 Public Law 116-260 provides \$25 million for the SAT Grant Program.

Deadline: December 14, 2021

U.S. Department of Justice

NIJ Multisite Impact and Cost-Efficiency Evaluation of Veterans Treatment Courts, Fiscal Year 2022 CFDA 16.560

The Department of Justice is committed to advancing work that promotes civil rights, increases access to justice, supports crime victims, protects the public from crime and evolving threats, and builds trust between law enforcement and the community.

With this solicitation, NIJ, in collaboration with the Bureau of Justice Assistance (BJA), seeks applications for funding to conduct a multisite impact and cost-efficiency evaluation of veterans treatment courts (VTCs). NIJ proposes to make one award as a cooperative agreement under this solicitation. The awardee will lead a cross-site evaluation involving court and research partners in up to six VTCs across the U.S. Incorporating experimental design and other research methods, the process, impact, and cost study will examine:

Program impact on relapse, recidivism, and other outcomes

For whom are programs effective

Which program elements are effective

Whether programs are cost-efficient

Topics of interest include veterans with violent offense histories, mental health and comorbidity, leveraging technology, peer mentoring, and equitable service access. The 5-year period of performance will begin with a planning phase to confirm the research protocol including VTC site selection.

In the case of partnerships that will involve the use of federal award funds by multiple partnering agencies to carry out the proposed project, only one entity/partnering agency may be the applicant (as is the case with any application submitted in response to this solicitation); any others must be proposed as subrecipients.

This solicitation supports DOJ Strategic Objective 3.1: Combat violent crime, promote safe communities, and uphold the rights of victims of crime. It also supports the National Institute of Justice Courts Strategic Research Plan, 2020-2024.

NIJ plans to post on its website a webinar that will provide information on the cross-site evaluation, research solicitation, and research partner site eligibility.

Deadline: January 13, 2022

W.E.B. Du Bois Program of Research on Reducing Racial and Ethnic Disparities in the Justice System, Fiscal Year 2021 CFDA 16.560

The Department of Justice is committed to advancing work that promotes civil rights, increases access to justice, supports crime victims, protects the public from crime and evolving threats, and builds trust between law enforcement and the community.

The W.E.B. Du Bois Program supports quantitative and quantitative research that furthers the Department's mission by advancing knowledge regarding the intersections of race, crime, violence, and the administration of justice within the United States. In FY 2021 under the W.E.B. Program, NIJ seeks applications for funding of investigator-initiated research examining how observed racial and ethnic disparities in the justice system might be reduced through public policy interventions at any point during the administration of justice. NIJ seeks applications for funding from two categories of researchers:

W.E.B. Du Bois Scholars - Researchers who are advanced in their careers (awarded a terminal degree at least seven years prior to December 31, 2021) may apply for grants for research, evaluation, and mentoring less-experienced researchers.

W.E.B. Du Bois Fellows - Researchers who are early in their careers (awarded a terminal degree within seven years of December 31, 2021) may apply for grants for research and evaluation.

Under this solicitation, NIJ will only consider applications for research on public policy interventions that may reduce racial and ethnic disparities in the justice system.

Prospective applicants from all racial and ethnic backgrounds are eligible to apply to the W.E.B. Du Bois Program. Researchers of color and women are strongly encouraged to apply. Applications must identify under which Category a proposal is submitted. NIJ will accept proposals to examine how observed racial and ethnic disparities in the justice system might be reduced through public policy in either the criminal and juvenile justice context or both.

Although not required, NIJ encourages applicants to consider researcher-practitioner partnerships in responding to this solicitation. Research can provide practical solutions to the obstacles faced by criminal justice practitioners as they work to reduce racial and ethnic disparities. Through these partnerships, criminal justice practitioners can independently assess their programs and measure outcomes. Likewise, criminal justice researchers can better understand the goals and purposes criminal justice practitioners seek to achieve, and therefore provide more practical solutions for practitioners. Ultimately, these partnerships provide criminal justice practitioners with practice- and policy-relevant information, while affording researchers the opportunity to contribute to the current body of knowledge.

Applications proposing research involving partnerships with criminal justice or other agencies should include a strong letter of support, signed (hard/wet, electronic, digital signature) by an appropriate decision-making authority from each proposed partnering agency. A letter of support should include the partnering agency's acknowledgment that de-identified data derived from, provided to, or obtained through this project will be archived by the grant recipient with the National Archive of Criminal Justice Data (NACJD) at the conclusion of the award. Applicants and their potential partners are encouraged to review the NACJD's policies and protections. If selected for an award, grantees will be expected to have a formal agreement in place with partnering agencies by July 1, 2022. That formal agreement must include a provision to meet the data archiving requirements of the award.

In the case of partnerships that will involve the use of federal award funds from multiple partnering agencies to carry out the proposed project, only one entity/partnering agency may be the applicant (as is the case with any application submitted in response to this solicitation); any others must be proposed as subrecipients.

Deadline: December 30, 2021

U.S. Department of Labor

National Dislocated Worker Grants Program Guidance-(CFDA 17.277)

National Dislocated Worker Grants (DWGs) are discretionary grants awarded by the Secretary of Labor under Section 170 of the Workforce Innovation and Opportunity Act (WIOA) to provide employment-related services for dislocated workers. The Department funds two types of DWGs: Disaster Recovery and Employment Recovery.

Disaster Recovery DWGs provide funding to create temporary employment opportunities to assist with clean-up and recovery efforts when an area impacted by an emergency or major disaster is declared eligible

for public assistance by the Federal Emergency Management Agency (FEMA) or is declared, or otherwise recognized, as an emergency or disaster of national significance by a Federal agency with authority or jurisdiction over Federal response to the disaster or emergency.

Employment Recovery DWGs temporarily expand capacity to serve dislocated workers and to meet the increased demand for employment and training services following a qualifying event. Qualifying events include major economic dislocations, such as plant closures, mass layoffs, or higher-than-average demand for employment and training activities for dislocated members of the Armed Forces and their spouses. Under 20 CFR 687.110(a)(5),the Secretary of Labor may determine other major dislocations eligible for Employment Recovery DWGs.

Deadline: Rolling grant

U.S. Department of State

DRL Internet Freedom Annual Program Statement CFDA 19.345

The Bureau of Democracy, Human Rights and Labor (DRL) announces a Request for Statements of Interest (RSOI) from organizations interested in submitting Statements of Interest (SOI) for programs that support the policy objective to support the Internet Freedom.

Deadline: November 15, 2021

U.S. Department of Transportation

2021 Surface Transportation System Funding Alternatives (STSFA) Grants CFDA 20.200

The Fixing America's Surface Transportation (FAST) Act of 2015, Pub. L. No. 114-94, § 6020, authorized the Secretary of Transportation to establish the Surface Transportation System Funding Alternatives (STSFA) Program. The purpose of the STSFA Program is to provide grants to States to demonstrate user-based alternative revenue mechanisms that utilize a user-fee structure to maintain the long-term solvency of the Highway Trust Fund. The FAST Act authorized \$15 million in FY 2016, and \$20 million annually from FY 2017 through 2020 from the Highway Research and Development Program for grants for the STSFA demonstration projects.

The grants are only available to States; however, groups of States can form partnerships for regional or national proposals.[3] Section 6020 of the FAST Act authorizes DOT to enter into agreements with State authorities to demonstrate user-based alternative revenue mechanisms.

Deadline: November 1, 2021

FY21-CRS-Consolidated Rail Infrastructure and Safety Improvements CFDA 20.325

This program funds projects that improve the safety, efficiency, and reliability of intercity passenger and freight rail.

Deadline: November 29, 2021

U.S. Department of Treasury

RESTORE Act Direct Component - Construction and Real Property Activities CFDA 21.015

Under the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States Act of 2012 (RESTORE Act), Subtitle F of P.L. 112-141, the Gulf Coast Restoration Trust Fund (Trust Fund) was established in the Treasury of the United States. Eighty percent of the civil penalties paid after July 6, 2012, under the Federal Water Pollution Control Act in connection with the Deepwater Horizon oil spill will be deposited into the Trust Fund and invested. The RESTORE Act created five components through which funds will be disbursed.

Treasury is publishing multiple funding opportunity notices as part of the RESTORE Act. This announcement applies only to the Direct Component, and is only for applications for eligible non-construction activities, including projects with or without a non-federal share for another federally funded project. This announcement also includes planning assistance needed to prepare the Multiyear Implementation Plan (Multiyear Plan) required by the RESTORE Act. For eligible activities involving construction and/or acquisition of real property, applicants should refer to the construction and real property acquisition funding opportunity announcement.

Trust Fund amounts are available to carry out eligible activities described in the RESTORE Act. These are:

- 1. Restoration and protection of the natural resources, ecosystems, fisheries, marine and wildlife habitats, beaches and coastal wetlands of the Gulf Coast region.
- 2. Mitigation of damage to fish, wildlife and natural resources.

- 3. Implementation of a federally approved marine, coastal, or comprehensive conservation management plan, including fisheries monitoring.
- 4. Workforce development and job creation.
- 5. Improvements to or on State parks located in coastal areas affected by the Deepwater Horizon oil spill.
- 6. Infrastructure projects benefitting the economy or ecological resources, including port infrastructure.
- 7. Coastal flood protection and related infrastructure.
- 8. Planning assistance.
- 9. Administrative costs.
- 10. Promotion of tourism in the Gulf Coast region, including recreational fishing.
- 11. Promotion of the consumption of seafood harvested from the Gulf Coast region.

Deadline: January 30, 2022

RESTORE Act Direct Component-- Non-Construction Activities CFDA 21.015

Under the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States Act of 2012 (RESTORE Act), Subtitle F of P.L. 112-141, the Gulf Coast Restoration Trust Fund (Trust Fund) was established in the Treasury of the United States. Eighty percent of the civil penalties paid after July 6, 2012, under the Federal Water Pollution Control Act in connection with the Deepwater Horizon oil spill will be deposited into the Trust Fund and invested. The RESTORE Act created five components through which funds will be disbursed.

Treasury is publishing multiple funding opportunity notices as part of the RESTORE Act. This announcement applies only to the Direct Component, and is only for applications for eligible non-construction activities, including projects with or without a non-federal share for another federally funded project. This announcement also includes planning assistance needed to prepare the Multiyear Implementation Plan (Multiyear Plan) required by the RESTORE Act. For eligible activities involving construction and/or acquisition of real property, applicants should refer to the construction and real property acquisition funding opportunity announcement.

Trust Fund amounts are available to carry out eligible activities described in the RESTORE Act. These are:

- 1. Restoration and protection of the natural resources, ecosystems, fisheries, marine and wildlife habitats, beaches and coastal wetlands of the Gulf Coast region.
- 2. Mitigation of damage to fish, wildlife and natural resources.

- 3. Implementation of a federally approved marine, coastal, or comprehensive conservation management plan, including fisheries monitoring.

- 10. Promotion of tourism in the Gulf Coast region, including recreational fishing.
- 11. Promotion of the consumption of seafood harvested from the Gulf Coast region.

Deadline: January 30, 2022

U.S. Department of Veterans Affairs

State Veterans Home Construction Grant Program CFDA 64.005

Grants are available to State Governments for construction or renovations of State operated Veterans Extended Care Facilities. The Department of Veterans Affairs participation may not exceed 65% of the total project costs. Review governing regulation before submitting an application (38 CFR Part 59). If the state is submitting a new grant application, it must submit a complete initial application (Section A of the project checklist) on Grants.gov by April 15th in order to be eligible for listing on the Priority List for the next fiscal year. Once the complete initial application is retrieved from Grants.gov by Program Staff, the grant applicant will receive 1) an automated notification from Grants.gov confirming receipt by the Program and 2) an email from Program Staff indicating the application's FAI number and corresponding project page in MAX.gov for submission of subsequent items. Note that Grants.gov is used only once to submit a new grant application. Applicants must submit complete initial applications on Grants.gov in order to be considered. Please contact Program Staff prior to submission if you need assistance understanding the requirements pertaining to an initial grant application, or if you need general assistance. Renovation or Life Safety initial grant applications require items A.1.-A.7. in Section A of the project checklist. Grant applicants, do not submit items A.8.-.A.13 for Renovation of Life Safety grants. New Home Construction or Bed Replacement initial grant applications require all items in Section A (A.1.-A.13) of the project checklist.

Required for ALL applications

A.1.A Project Scope

- A.1.B Form SF424
- A.1.C Form SF424D
- A.1.D Form SF424C
- A.1.E Budget Justification Worksheet (must align with SF424C budget form)
- A.2. Governor's designation of authorized state official and contact person
- A.3. Needs assessment (as outlined in VA Form 10-0388-1)
- A.4. State Clearinghouse Comments (E.O. 12372) single point of contact and compliance statement
- A.5. Schematics
- A.6. Signed Initial Application Certification VA Form 10-0388-1
- A.7. Safety citation/letter (Only Life Safety projects need to submit this).

Required for Bed Replacement or New Construction - Items A1-A6 and the below items

- A.8. Space program analysis (NHC use Form 10-0388-3, ADHC use Form 10-0388-4)
- A.9. Five-year capital plan for state's entire state home program
- A.10. Financial plan for state facility's first three years of operation
- A.11. Documentation that there is a reasonable basis to conclude that the facility when complete will be fully occupied
- A.12. Authorized state official's certification of the total number of state-operated nursing home and domiciliary beds and occupancy rate
- A.13. Authorized state official's certification that the number of state home beds does not exceed the requirement in 38 CFR 59.40 or justification for number of state home beds exceeding 38 CFR 59.40 based on travel distance.

Deadline: Rolling (Applications should be submitted by April 15 of the fiscal year)

Section III PROGRAM FUNDING THROUGH PRIVATE, CORPORATE & COMMUNITY FOUNDATIONS

Boat US Foundation Accepting Grant Applications for Safe and Clean Boating Projects

The Boat US Foundation for Boating Safety and Clean Water is accepting applications for its Grassroots Grants Program, which awards funds on an annual basis to nonprofit organizations, boating clubs, and

student groups in the United States for projects that utilize innovative approaches to education about safe and clean boating.

The foundation is looking for creative projects that promote safe and clean boating on local waterways. Past topics have ranged from PSAs on the effects of boating under the influence of hands-on education about the effects of marine debris.

Projects the foundation is most interested in funding will be unique (topic, methods, or delivery mechanism); include extensive outreach to boaters; use technology to educate boaters, including social media and the Web; have a widespread reach (not just a handful of boaters); include hands-on work with the boating community, and have a way to measure the success of the program.

Applicants can include boating groups, clubs and associations, student groups, and local nonprofit organizations, including local chapters of national organizations. Grants will not be awarded to government agencies, international organizations, for-profit businesses, or individuals.

Applicants may request up to \$10,000. Funded projects must be completed within a year.

Deadline: Open

Baseball Tomorrow Fund

The Baseball Tomorrow Fund (BTF) awards grants to non-profit and tax-exempt organizations involved in the operation of youth baseball and/or softball programs and facilities. Organizations operating in the U.S. and international locations are eligible to apply. To date, an average of 400 requests are received annually; approximately 10 percent are awarded grants. Grants are awarded every quarter.

Review cycle deadlines:

• January-March: January 1

April-June: April 1July-September: July 1

• October-December: October 1

Surdna Foundation Sustainable Environment Grants

The Sustainable Environments Program is working to overhaul our country's outdated and crumbling infrastructure with a new approach that will foster healthier, sustainable, and just communities. We believe in the potential of what we call "next-generation infrastructure" to improve transit systems, make buildings more energy-efficient, better manage our water systems and rebuild regional food systems. Focusing on urban areas and their surrounding suburbs, we seek solutions that connect and improve these infrastructure systems in ways that maximize positive impacts and minimize negative environmental, economic and social consequences.

JFNY Grant for Arts and Culture

The Japan Foundation New York office (JFNY) accepts applications for projects that take place within the 37 states east of Rocky Mountains listed below for the JFNY Grant throughout the year. This grant aims to support projects that will further understand of Japanese arts and culture. Successful projects may be granted up to \$5,000. Priority will be given to those projects that have secured additional funding from sources other than the Japan Foundation.

Deadline: Applications must be received at least 3 months before the beginning date of the project.

CSX Beyond Our Rails Grant

CSX provides non-profit assistance and support through a variety of programs, including grants that typically range from \$2,500 to \$5,000 for projects focusing on safety, community, wellness, and/or the environment.

Examples given for environmental projects include:

- Teaching environmental stewardship
- Planting eco-friendly trees and plants
- Leading and supporting environmental cleanups
- Recycling and waste minimization
- Promoting energy efficiency and carbon reduction

Deadline: Ongoing

<u>Laboratory Equipment Donation</u> <u>Program for Colleges, Universities, and</u> <u>Museums</u>

The Laboratory Equipment Donation Program (LEDP), formerly the Energy-Related Laboratory Equipment (ERLE) Grant Program, was established by the United States Department of Energy (DOE) to grant surplus and available used energy-related laboratory equipment to universities and colleges in the United States for use in energy-oriented educational programs.

Deadline: Ongoing

Zayed Future Energy Global High Schools Prize

The primary aim of the Global High Schools category is to inspire future generations across the globe by instilling an ethos of sustainability from an early age, including an appreciation of issues in energy, and broader sustainability. Each school will submit a detailed proposal for a project, and the Prize will become a grant that enables the project's completion. While the main objective is to promote sustainability in

schools, a special emphasis of the proposed project should be on specific measurable initiatives to promote renewable energy and sustainability, which may include improvements in energy or water efficiency or a reduction in waste.

Waste Management Charitable Giving

Healthy thriving communities depend on involved citizens, organizations and corporate partners for momentum. We lend our support and services to causes that promote civic pride, economic development, and revitalization. Every community has its challenges, and we strive always to be part of problem-solving initiatives. Programs that Waste Management is most motivated to support include environment, environmental education, and causes important to the areas where we operate. Applications are accepted year-round and are reviewed continuously. Given the large number of requests received, please anticipate an estimated two-month review period for each request.

Clif Bar Foundation Small Grants

These grants are awarded for general organizational support as well as funding for specific projects. Small grants average approximately \$7,000 each. Priority is given to applicants that: Address our funding priorities from a holistic perspective; Protect Earth's beauty and bounty; Create a robust, healthy food system; Increase opportunities for outdoor activity; Reduce environmental health hazards; Build stronger communities; Operate with clearly defined objectives and viable plans to achieve them; Demonstrate strong community ties and operate at the community level; Promote positive change through both the projects and their implementation process.

Deadline: Applications are reviewed three times a year; the deadlines are the 1st of February, June, and October. Grants awarded during a particular cycle will be announced at the beginning of the following cycle.

Foundation for Contemporary Art Accepting Applications for Emergency Grants

Since its inception in 1963, the mission of the Foundation for Contemporary Arts has been to encourage, sponsor, and promote innovative work in the arts created and presented by individuals, groups, and organizations.

Created in 1993, the foundation's Emergency Grants program provides grants of up to \$2,000 to innovative visual and performing artists who have unanticipated, sudden opportunities to present their work to the public when there is insufficient time to seek other sources of funding; or who incur unexpected or unbudgeted expenses for projects close to completion with committed exhibition or performance dates.

To be eligible, applicants must be living, working, and paying taxes in the United States; have committed to a performance or exhibition opportunity and be able to provide specific dates at the time of application;

and be an individual artist or an individual representing an artist collective, ensemble, or group. Curators, producers, workshop organizers, organizations, or arts presenters are not eligible to apply.

Deadline: OPEN

Weyerhaeuser Giving Fund

We support the U.S. and Canadian communities where we have a significant presence or business interest. These communities range from rural to metropolitan, each with unique priorities and needs. Our employees serve on local advisory committees for our Giving Fund and develop funding priorities within four focus areas to support their particular communities. This provides a strong companywide framework for giving while allowing flexibility to meet unique needs in our different communities.

Through the Weyerhaeuser Giving Fund we concentrate the majority of our funding in four focus areas:

- Affordable Housing and Shelter
- Education and Youth Development
- Environmental Stewardship
- Human Services, Civic and Cultural Growth

To be eligible for funding, a program must:

- Serve a Weyerhaeuser community
- Be a tax-exempt, nonprofit public charity classified under Section 501(c)(3) of the U.S. Internal Revenue Code OR a registered charity in Canada with a Canada Revenue Agency Number, or registered as a provincial nonprofit society OR a public education institution or government entity qualified under Section 170(c)(1) of the U.S. Internal Revenue Code or qualified as a Canadian municipality.

Wells Fargo Corporate Giving Programs

Wells Fargo supports nonprofit organizations that work on a community level in the areas of human services, arts and culture, community development, civic responsibility, education, environmental consciousness, and volunteerism.

Deadline: Applications accepted on an ongoing basis.

Good Sports Accepting Applications for Sports Equipment Grant

Good Sports helps lay the foundation for healthy, active lifestyles by providing athletic equipment, footwear, and apparel to disadvantaged young people nationwide. By working closely with teams, coaches, and community leaders across the United States, the organization can focus on the respective needs of each program and help offset the main factors causing the greatest challenges.

Good Sports is accepting applications from organizations and schools for equipment, apparel, and footwear for a wide range of sports. Organizations that are approved will have access to equipment, apparel, and footwear inventory for two years. During that time, organizations can make up to six separate donation requests — as long as the need is well documented, donations will be granted. There is no need to resubmit a full application again during the two years.

To be eligible, applicants must directly serve youth between the ages of 3 and 18; serve youth in an economically disadvantaged area; be located in North America (the U.S. and Canada); and operate an organized sport, recreational activity, or fitness program that offers a consistent and structured opportunity for play to large groups of children. Schools must apply as a whole; applications for individual programs within a school will not be considered. Donation requests for short-term events such as sports camps and tournaments or to individual athletes will not be considered.

While the equipment, apparel, and footwear received through the program are free, recipients are expected to pay shipping and handling costs, which amount to roughly 10 percent of the donation value, with a maximum fee of \$1,500.

Deadline: Applications are reviewed on a rolling basis. It is recommended, however, that organizations apply at least eight weeks before the start of their particular season or program to ensure the desired equipment can be accessed and shipped on time.

Karma for Cara Foundation Invites Applications for Youth Microgrants

The Karma for Cara Foundation is a nonprofit founded by 21-year-old Cara Becker and her family while she was undergoing treatment for leukemia at the Johns Hopkins Kimmel Cancer Center. Cara and her two brothers began volunteering at a young age as part of their family's commitment to community service. She and her family saw a tremendous need to help support other patients and their families who were also challenged by cancer. Tragically, Cara passed four months after her diagnosis, yet her wish to help others through K4C lives on with the support of an ever-growing circle of family and friends.

As part of an effort to promote and support youth voluntarism, k4C started a microgrant program in fall 2014 to encourage kids 18 and under to apply for a grant of between \$250 and \$1,000 to complete service projects in their communities. Examples of fundable projects include but are not limited to turning a vacant lot into a community garden, rebuilding a school playground, and helping senior citizens get their homes ready for winter. Grants will be distributed as gift cards to home goods stores, office supply stores, grocery food chains, and toy stores.

Deadline: OPEN

VFW Accepting Applications From Veterans for Emergency Financial Assistance

Veterans of Foreign Wars is accepting applications from active and discharged military service members who have been deployed in the last six years and have run into unexpected financial difficulties as a result of deployment or other military-related activity. Since the program's inception, Unmet Needs has distributed more than \$5 million in assistance to qualified military families, with nearly half of those funds going directly toward basic housing needs.

The hardship must be the result of deployment, a military pay issue, or military-related illness or injury. It cannot be due to civil legal or domestic issues, misconduct, or any issues that are a result of spousal separation or divorce, financial mismanagement, or bankruptcy.

Deadline: OPEN

Start a Snowball Invites Applications for Youth Philanthropy Projects

Start a Snowball, Inc. encourages kids of all ages to engage in philanthropic and community service activities. The organization believes that even one child with the right intentions and support can start a project that seems small in the beginning and eventually grows ("snowballs") into something that inspires and benefits an entire community.

To help kids, kick off their philanthropy efforts, start a Snowball awards \$100 in seed funding for projects taken on by individuals or organizations.

To be eligible, projects must be led by youth between the ages of 5 and 18 and have the intention of doing good.

Start a Snowball does not give directly to collection funds. The organization also does not provide support for fundraisers for sports teams, unless they serve an underserved or disadvantaged group or support projects that are discriminatory or political.

Deadline: Rolling

<u>Craft Emergency Relief Fund Accepting</u> <u>Applications From Craftspeople in Need</u>

The Craft Emergency Relief Fund is a national nonprofit organization that awards small grants and loans to professional craftspeople experiencing career-threatening illness, accident, fire, theft, or natural disaster.

Financial assistance ranges from \$500 to \$8,000. Other services include referrals to craft suppliers who have agreed to offer discounts on materials and equipment to craftspeople eligible for CERF funds and booth fee waivers from specific craft show producers.

CERF loan recipients are expected to repay the loan in full within five years, enabling CERF to have funds readily available for future craftspeople in need.

Applicants must be a professional artist working in a craft discipline (e.g., a potter, metalsmith, glass artist, woodworker, fiber artist, or furniture maker) who has had a recent career-threatening emergency and a legal resident of the U.S.

Deadline: OPEN

Pollock-Krasner Foundation Accepting Applications From Artists With Financial Need

The mission of the Pollock-Krasner Foundation is to aid those individuals who have worked as artists over a significant period. The foundation's dual criteria for grants are recognizable artistic merit and financial need, whether professional, personal or both.

Grants are intended for one year, with the size of the grant to be determined by the artist's circumstances and professional exhibition history. Artists applying for a grant must be actively exhibiting their current work in a professional artistic venue such as a gallery or museum space.

The foundation does not accept applications from commercial artists, video artists, performance artists, filmmakers, crafts-makers, computer artists, or any artist whose work primarily falls into these categories.

Deadline: OPEN

Pollination Project Invites Applications From Social Entrepreneurs for Seed Grants

The Pollination Project is accepting applications from social entrepreneurs looking to make their communities and world a better place. Seed grants of up to \$1,000 will be awarded to projects in the early stages of development, including those that promote compassion toward all life (people, planet, animals), environmental sustainability, justice in all its forms, community health and wellness, and social change-oriented arts and culture. Only applications for seed funding, as opposed to ongoing operational or program costs of a nonprofit organization, will be accepted. To be eligible, applicants must be a passionate, committed individual with a social change vision that fits within one or more of the categories above. Established nonprofit organizations with paid staff will not be considered.

Deadline: OPEN

Hope for The Warriors Accepting Applications for Critical Care Support for Wounded Veterans

Hope For The Warriors believes those touched by military service can succeed at home by restoring their sense of self, family, and hope. Nationally, the organization provides service members, veterans, and military families with comprehensive support programs focused on transition, health and wellness, peer engagement, and community resources.

Originally designed to meet short-term needs in the days following an injury, the Hope for The Warriors' Critical Care Coordination program has expanded to assist post-9/11 combat-wounded veterans and their families as they navigate through long-term recovery.

Program case coordinators work daily with post-9/11 combat-wounded service members and veterans, their families, and families of the fallen to meet immediate financial needs related to daily living including utilities, groceries, rent, mortgage, and rental deposits. The program provides casework assistance and resource referrals that will help clients immediately and in the future. Payment is always made to a third party.

To be eligible, applicants must be seeking support for needs that are a direct result of a service member's post-9/11 combat-related injury.

Deadline: OPEN

Singing for Change Accepting LOIs for Projects to Address Social and Environmental Problems

Created by Jimmy Buffett in 1995, Singing for Change initially was funded with contributions from the singer's summer concert tour. Since then, SFC has offered competitive grants to progressive nonprofit organizations working to address the root causes of social or environmental problems.

Priority will be given to organizations that keep their overhead low, include community members in planning, and collaborate with other groups to find innovative ways of solving common problems. SFC aims to advance the common good by empowering people to thrive and strengthen and sustain vibrant, diverse communities.

Grants will range in size from 1,000 to 10,000. Grants are made only to nonprofit organizations with tax-exempt status under section 501(c)(3) of the Internal Revenue Code, or to organizations that have a sponsoring agency with exempt status.

Deadline: Ongoing

A Little Hope Announces Youth Bereavement Support Services Grants

A Little HOPE supports organizations that provide bereavement support services and grief counseling to children and teens who have experienced the death of a parent, sibling, or loved one.

To be considered, applicants must e-mail (no telephone calls) the name of their program, website address, names of the executive director and program director, and the location of the program. No other information is needed or will be processed. Strong preference will be given to applicants who demonstrate a commitment to the use of community trained volunteers. Grant award amounts are based on the scope and budget of the project.

Deadline: OPEN

Captain Planet Foundation Offers Grants for Hands-On Environmental Education Activities

The mission of the Captain Planet Foundation is to promote and support high-quality educational programs that help children and youth understand and appreciate our world through hands-on learning experiences aimed at improving the environment in their schools and communities.

Grants are intended to serve as a means of bringing environment-based education to schools and inspiring youth and communities to participate in community service through environmental stewardship activities. The foundation will fund unique and innovative projects that do not precisely match the grant guidelines but otherwise promote the foundation's mission to advance hands-on environmental activities.

Deadline: January 31 (typically for fall and winter projects), September 30 (typically for spring and summer projects)

<u>Chambers of Commerce Invited to Start</u> <u>Young Entrepreneur Academies</u>

The Young Entrepreneurs Academy today serves thousands of students across America. In 2011, the United States Chamber of Commerce Foundation became a national sponsor and partner of the academy to help celebrate the spirit of enterprise among today's youth and the future leaders of tomorrow.

To that end, YEA, in partnership with Sam's Club and the U.S. Chamber of Commerce Foundation, is accepting applications from chambers of commerce across the country to start Young Entrepreneurs academies of their own. The thirty-week program teaches students in grades 6-12 how to generate business ideas, conduct market research, write business plans, pitch to a panel of investors, and launch their own companies. In 2015, Sam's Club will award startup funds of up to \$2,500 each to thirty chambers of commerce across the country.

Cornell Douglas Foundation Grant

The Cornell Douglas Foundation provides grants to organizations that advocate for environmental health and justice, encourage stewardship of the environment, and further respect for the sustainability of resources. The average grant amount is \$10,000.

Deadline: accepted all year

Public Welfare Foundation

The Public Welfare Foundation has three programs, Criminal Justice, Juvenile Justice, and Workers' Rights, that support efforts to advance justice and opportunity for people in need. The Foundation looks for strategic points where its funds can make a significant difference and improve lives through policy and system reform that results in transformative change.

Criminal Justice Guidelines

The Foundation's Criminal Justice Program supports groups that are working to end the over-incarceration of adults in the United States while also aiming to reduce racial disparities. In particular, the Program makes grants primarily to state-based groups that are working to:

• Reduce state incarceration levels and racial disparities through reforms in sentencing, charging, and supervision policies and procedures.

• Advance the redirection and prioritization of state and local resources toward targeted investments that support system-involved individuals in their communities, through research and strategic thought leadership.

Juvenile Justice Guidelines

The Foundation's Juvenile Justice Program supports groups working to end the criminalization and reliance on the incarceration of youth in the United States. The Program makes grants to groups that are working to:

- Advance state policies that dramatically restrict juvenile justice systems' use of incarceration and out-of-home placements and prioritize the use of community-based programs for youth;
- End the practice of trying, sentencing, and incarcerating youth in the adult criminal justice system; and
- Promote the fair treatment of youth of color who come into contact with the juvenile justice system.

Workers' Rights Guidelines

The Foundation's Workers' Rights Program supports policy and system reforms to improve the lives of low-wage working people in the United States, with a focus on securing their basic legal rights to safe, healthy, and fair conditions at work. Specifically, the Program makes grants to groups working to:

- Advance reforms to hold employers accountable for wage theft;
- Advance reforms to prevent severe illness, injury, and death on the job; and
- Advance workers' rights in complex, fissured employment arrangements through research and strategic thought leadership.

Ben & Jerry's Foundation Seeks Proposals for Social and Environmental Justice Projects

One-year grants of up to \$20,000 will be awarded to nonprofit grassroots community-organizing groups in the United States working to further social and environmental justice and support sustainable and just-food systems. Grants can be used to support both program and operational costs.

KaBOOM! Invites Applications for Community Playground Grants

KaBOOM!, a program that provides eligible communities with most of the funds, tools, and resources they need to build a custom-made playground in one day.

Deadline: OPEN

Binoculars for Young Citizen Scientists

Cornell's BirdSleuth K-12 initiative is awarding binoculars to schools where educators have made outstanding efforts to engage their students in citizen science.

Deadline: OPEN

International Paper Environmental Education Grants

The International Paper (IP) Foundation supports non-profit organizations in communities where its employees live and work. Environmental education is one of the primary areas the Foundation supports. The Foundation seeks programs that help generations understand a sustainable approach to business that balances environmental, social and economic needs.

Lego Children's Fund

The LEGO Children's Fund provides grants primarily in two focus areas: (1) early childhood education and development that is directly related to creativity and (2) technology and communication projects that advance learning opportunities. Typical awards are between \$500 and \$5,000. Interested parties must complete an eligibility quiz, be approved and invited to submit a grant proposal. Each grant will be subject to a specified time frame for completion.

Deadline: Applications accepted four times a year.

Evidence for Action: Investigator-Initiated Research to Build a Culture of Health

Evidence for Action (E4A), a national program of the Robert Wood Johnson Foundation, funds research that expands the evidence base needed to build a Culture of Health. Our mission is to support rigorously designed quantitative, qualitative, and mixed methods research that yields convincing findings regarding the population health, well-being, and equity impacts of specific policies, programs, and partnerships. We are especially interested in research examining the health impacts of programmatic or policy interventions that address factors outside the domain of health care services or public health practice.

Deadline: Open

Pioneering Ideas Brief Proposals

The goal of the Pioneering Ideas Brief Proposal funding opportunity is to explore; to look into the future and put health first as we design for changes in how we live, learn, work and play; to wade into uncharted

territory to better understand what new trends, opportunities, and breakthrough ideas can enable everyone in America to live the healthiest life possible.

While improving the status quo is vital to the health and well-being of millions of Americans now, the Pioneering Ideas Brief Proposal opportunity reaches beyond incremental changes to explore the ideas and trends that will influence the trajectory and future of health. Ultimately, we support work that will help us learn what a Culture of Health can look like—and how we can get there.

Deadline: Open

Section IV STATE OF ALABAMA GRANTS

Alabama Power Foundation Grant

The Alabama Power Foundation Grant offers funds to nonprofit organizations in Alabama working in one of the following areas:

- Health
- Human services
- Arts
- Community life
- Education
- Environment

Priority is given to projects that address underserved segments of the population and can be duplicated in other communities.

Alabama Board of Medical Scholarship Awards

The Alabama Board of Medical Scholarship Awards offers forgivable loans to students enrolled in an Alabama medical school who agree to practice primary care in a pre-approved medically, underserved community in Alabama upon graduation.

Loans are repaid at the rate of one year of service per year of the loan.

Deadline: Applications accepted on an ongoing basis.

Economic Development Fund

Land, facilities, and infrastructure to benefit an industry that will create jobs. Create a minimum of 15 permanent jobs to benefit 51% low to moderate-income beneficiaries. Continuous. Applications are taken throughout the year. Maximum request: \$250,000. Minimum Request: \$50,000. Note: Waiver of the match available for applicants with 2010 Census population of 1,000 or less. May also waive the grant ceiling for projects that demonstrate significant long-term economic benefit to the State.

Contact: Community and Economic Development; Shabbir Olia, CED Programs Manager, 334.242.5462, shabbier.olia@adeca.alabama.gov

Economic Development Incubator projects

Units of local government. Applicants must maintain active registration with SAM. The program must benefit 51% of low to moderate-income beneficiaries. The project must commit to creating jobs. Maximum

request: \$250,000. Match request: 20%. Applications are taken throughout the year. Award upon approval and as funding is available. Application workshop held in April and compliance workshop held in the fall.

Contact: Community and Economic Development; Shabbir Olia, CED Programs Manager, 334.242.5462, shabbier.olia@adeca.alabama.gov

States' Economic Development Assistance Program (SEDAP)

Applicants: State and local units of governments, public bodies, and non-profit entities. Eligible counties in West Alabama: Bibb, Fayette, Hale, Lamar, Pickens, and Tuscaloosa.

Activities: Water and wastewater facilities, telecommunications, health care, planning activities, leadership development, education and training programs, business development, and entrepreneurship.

Requirements: Project must meet one of ARC's goals: increase job opportunities and per capita income, strengthen the capacity of people to compete in the global economy or develop and improve infrastructure to make the Region economically competitive. Construction projects funded by ARC must have an "Administering Agency" such as ADECA, USDA Rural Development or TVA. The project will be administered by and take on the requirements of that agency

Deadline: Pre-application due date in August. Applicant notified in late fall/winter if a full application is requested. Award announcements typically made in May.

Contact: Alabama Department of Economic and Community, Affairs (ADECA), Jimmy Lester, ARC Program Manager (334) 353-4490, <u>jimmy.lester@adeca.alabama.gov</u>

Alabama Humanities Foundation Grants

Applicants are encouraged to develop projects for a wide variety of audiences including library and museum patrons, teachers and scholars, youth, senior citizens, nursing home residents, hospital patients, the economically disadvantaged, the incarcerated, and the hearing and sight-impaired.

Application submission deadlines:

- Major Grants (\$1,500 and up) February 15, June 16, September 15
- Minor Grants (\$1,500 or less) February 15, June 16, September 15

Bank of America Grant

The Bank of America (BoA) offers grants that support high-impact initiatives, organizations and the development of visionary leaders. Schools with farm-to-school type programs may be eligible under the funding areas:

- Developing Career Leadership and Skills: Opportunities that increase civic and community engagement, career exploration and youth employment, financial knowledge and life-skill and soft-skill development
- Assisting with Food Access: Food deserts, green/fresh food access, etc

BoA's Charitable Foundation provides philanthropic support to address needs vital to the health of communities through a focus on preserving neighborhoods, educating the workforce for 21st-century jobs

and addressing critical needs, such as hunger. **Deadline:** Requests for proposals are issued three times per year.

Costco Wholesale Grants

Costco Wholesale grants support programs focusing on children, education and health and human services. They look to achieve the greatest impact where Costco's employees and members live and work. Only 501(c)(3) nonprofit organizations, which meet their giving guidelines and focus areas, are considered.

Deadline: Applications are accepted throughout the year on a rolling basis.

Walmart Foundation National Giving Program Grants

Through its National Giving Program, the Walmart Foundation awards grants of \$250,000 and above to non-profit organizations that operate on a national scope through chapters/affiliates in many states around the country or through programs that operate regionally/locally but seek funding to replicate program activities nationally.

Areas of focus for the Foundation include:

- Hunger Relief & Healthy Eating
- Sustainability
- Women's Economic Empowerment
- Career Opportunity

Deadline: OPEN

William G. McGowan Charitable Fund Issues Request for Proposals for Projects That Address Homelessness

The fund will award grants in support of initiatives that seek to correct circumstances contributing to homelessness, as well as initiatives designed to help eradicate the condition of homelessness in the long term.

Deadline: OPEN

Alabama Additional Funding Sources

Community Foundations in Alabama

There are 13 community foundations in Alabama, covering 78 percent of the counties in the state and holding assets that total more than \$190 million.

Daniel Foundation

The Daniel Foundation offers grants in four program areas: Civic and Community Improvement, Education, Health, and Arts and Culture. Applications are limited to 501 (c)(3) organizations that are located in Alabama.

Alabama Power Foundation

The Alabama Power Foundation allocates funding in four categories: Improving Education, Strengthening Communities, Promoting Arts and Culture, and Restoring and Enhancing the Environment.

Alabama Humanities Foundation

The AHF awards grants solely to support public humanities projects. Active public participation, the involvement of humanities scholars, and strong humanities content are the three essential components of AHF-funded projects.

Gwyn Turner Endowed Fund

The fund is administered by the National Trust for Historic Preservation, in partnership with Alabama Trust. Nonprofits and governmental agencies can obtain funding for preservation planning, heritage education, workshops, conferences, and special interventions. Grants range from \$1,000 to \$5,000 and require a 1:1 cash match.

Applicants are encouraged to discuss their project with the National Trust Southern Office before applying. Contact the Southern Office at 843.722.8552, or e-mail soro@nthp.org.

Sybil H. Smith Trust

Established in 1983, this trust funds organization in the First Congressional District only. Awards limited to arts, community development, education, and human services. No awards are given for individuals. For more information, call: 251.432.0208.

Alabama State Council on the Arts

Grants awarded to nonprofit organizations and local governments in the following categories: Presenting Grants, Project Assistance, Operating Support, Technical Assistance, Collaborative Ventures, and Program Development.

Historic Chattahoochee Commission

The Historic Chattahoochee Commission (HCC) promotes tourism and historic preservation in the Chattahoochee Trace, an 18-county region in Alabama and Georgia. The HCC supports preservation through two grant programs: Seed Grant and the Threatened Landmarks Program.

Veterans

FACT SHEET: Veterans Employment Center

The online Veterans Employment Center is the single federal source for Veterans looking for new career opportunities in the private and public sectors, as well as Service Members transitioning to the civilian workforce, military and Veteran spouses and dependents looking for employment opportunities, GI Bill beneficiaries transitioning from training to the job market and employers looking to connect with high-quality applicants. It is the first interagency tool that brings together public and private job opportunities with resume building and other career tools currently offered on a variety of websites together in one place.

Through the online Veterans Employment Center, Veterans, transitioning Service Members, and spouses are connected to high-quality career choices by matching their identified skills with the available public and private job opportunities. The site is built using an open application programming interface (API) to attract private sector innovation.

Veteran Applicant Resources:

- Quick public resume posting with an instant connection to thousands of public and private employers
- Target job search based on specific, high-demand career paths
- Single search for both public and private sector positions
- Military skills translator and resume generator
- Social media integration with popular bookmarking sites for saving job postings

Employer Resources:

- Access targeted feed of qualified resumes from Veteran applicants
- View reverse skills translation (military to civilian skills) for applicants
- Set Veterans hiring goals and track progress
- Connect to resources designed to help recruit and retain talented, Veteran employees

In connection with the First Lady and Dr. Biden's Joining Forces initiative, the Department of Veterans Affairs worked with the Departments of Defense, Labor, and Education, and the Office of Personnel Management to design and develop the site and incorporate features of existing online employment tools at each agency. The result is an upgrade to the existing Veterans Job Bank and an integrated solution connecting Veterans, transitioning Service Members and employers.

Employers, Veterans, and transitioning Service Members deserve a single, authoritative source for connecting. Now that the core tools and an integrated search function exist in one single location, each agency is engaged in minimizing duplication and redundancy of current sites and services.

The Veterans Employment Center can be found at https://www.ebenefits.va.gov/ebenefits/jobs%20%20

For a tutorial video on how to use the Veterans Employment Center, please visit:
